

Country Presentation

Maintenance of FMD free status and its Preparedness to FMD incursion

Indonesia

Dr. Nuryani Zainuddin

Director of Animal Health

Directorate General of Livestock and Animal Health
Ministry of Agriculture

Prevention activities to maintain FMD free status

Activity in 2021

- Improve the sensitivity of General Surveillance and targeted Surveillance for FMD
- Initial update on the possible risk pathway of FMD introduction

Key activities planned in 2022

- Finalization of New Guidelines for General Surveillance targeted Surveillance for FMD
- Socialization of new guidelines
- Training for District officers
- Integrating the new guidelines with capacity building program for Vet (FETPV)
- Continue to update the risk assessment on the possible incursion of FMD into Indonesia

Preparedness and Contingency Planning

Key changes/highlights in the FMD Preparedness and Contingency Planning in 2021

- Annual update on high-risk areas
- Improvement of laboratory capacity in testing
- Continued socialization activities for FMD preparedness

Key activities planned in 2022

- Increasing the awareness and communication activities for the field officer and farmers
 - ✓ Series of webinars
 - ✓ Other continuing education programs
 - ✓ Social media campaign
- Review and update the preparedness and contingency plan for FMD

Main challenges and recommended solution

- **Implementation of serological-surveillance is restricted due to the pandemic**
 - ✓ Continued to work with the local governments and regional disease investigation (lab) and optimize their support in the surveillance activities
 - ✓ Increasing general surveillance
- **Incursion of ASF affecting some of the main focus on FMD program**
 - ✓ Lesson learned from ASF (risk pathways and value chains) utilized to update the preparedness and contingency plan for FMD
