Background

- The FAO and WOAHA developed the PPR Global Control and Eradication Strategy and PPR Global Eradication Programme with the goal of eradicating the disease by 2030.
 - PPR GCES endorsed at the international Conference from 31 March to 2 April 2015
 - FAO and WOAHA established joint PPR Secretariat established in March 2016
 - Launched PPR Global Eradication Programme (PPR GEP) for 2017-2021 in October 2016
- Past and recent studies have demonstrated how transborder animal diseases (TADs) easily spread from South Asia and China into South East Asia.
- The risk and some events raised additional concerns on the region's preparedness to face PPR incursion.
- In 2021 ASWGL meeting, and considering the initial findings from the survey led by Thailand and Indonesia, the ASWGL agreed to develop an ASEAN PPR Preparedness Strategy.
- The ASEAN Secretariat/ ASGWL has requested the WOAHA SRR-SEA and FAO-RAP to support this activity.
- From July to September 2021, consultation between ASEAN Lead Countries (Indonesia and Thailand), FAO and WOAHA to develop ToR for Consultancy
- Consultation of ToR with ASEAN Member States through ASEAN Secretariat (November 2021 to January 2022)

Scope of the Project

- The Consultant will work closely with the core groups composed of technical staff from the ASEAN lead countries for PPR (Thailand and Indonesia), the WOA and FAO; two additional AMS (Malaysia and Myanmar) with support of PPR Secretariat and Advisory Group to deliver the following:
 - Provide training (virtually) to key staff from the national Veterinary Services on PPR to raise awareness and receive informed feedback on the PPR Preparedness Strategy to be developed.
 - Conduct a regional risk assessment related to PPR.
 - Develop the ASEAN PPR Preparedness Strategy in line with Global GF-TADs Strategy 2021-2025, PPR Global Eradication Programme, Global Strategy for the Control and Eradication of PPR and PMAT tools.

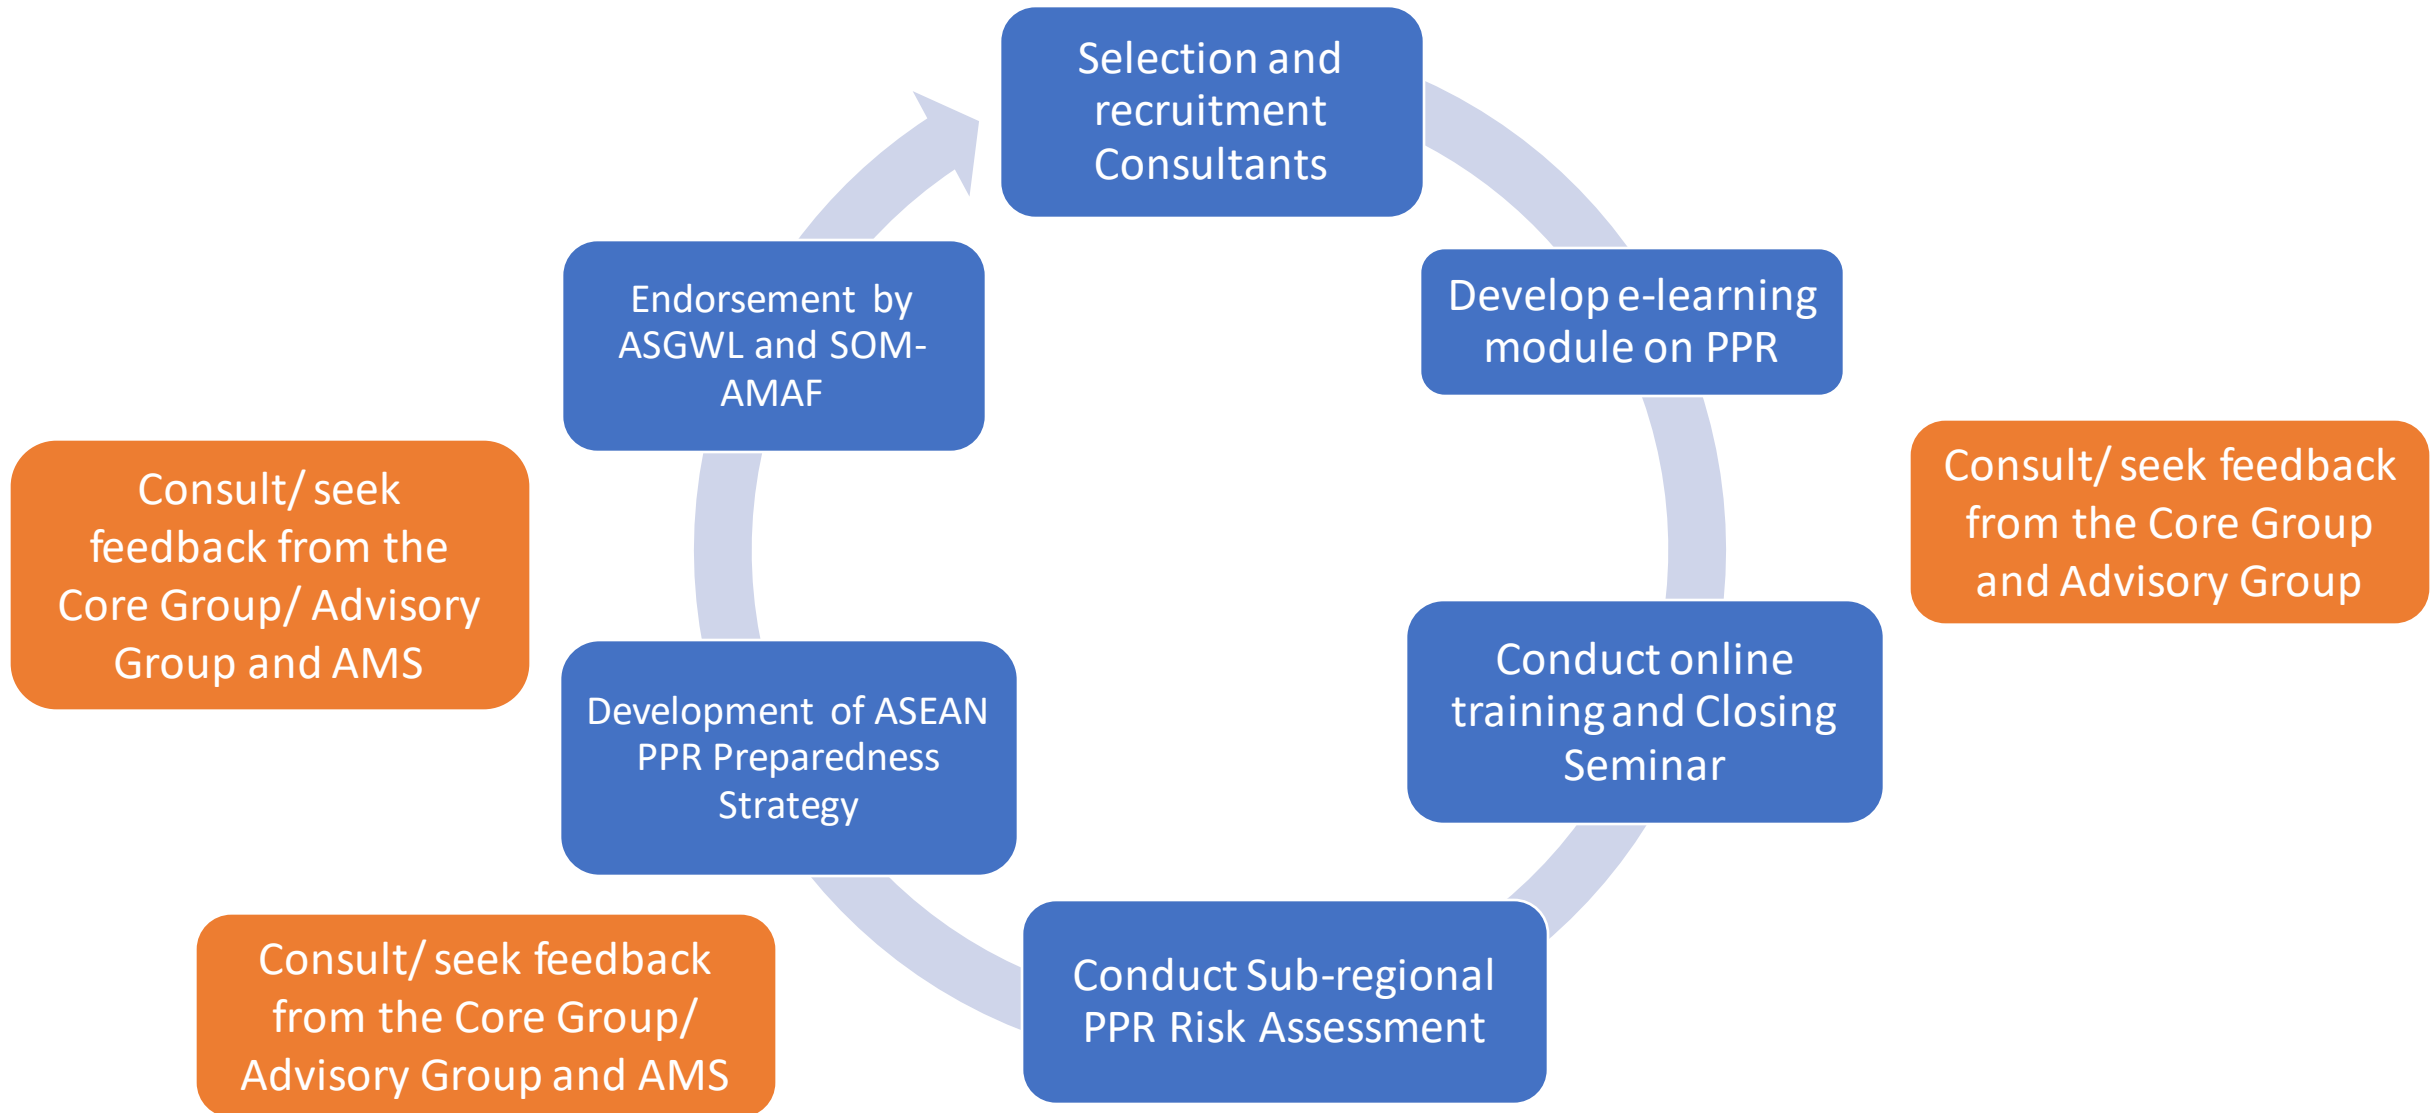

Objective of the ASEAN PPR Preparedness Strategy Project

- To enhance the knowledge and skills of the key staff from national veterinary services on PPR (Epidemiology, prevention and control, Global Control and Eradication strategies) through virtual training and webinars.
- To understand the risk of PPR incursion and country's preparedness through risk assessment; and
- To enhance early warning and early reaction to the PPR incursion in the respective countries and ASEAN region through development of ASEAN PPR Preparedness Strategy.
