## PVS Pathway and One Health tools for efficient Veterinary Services

22 – 24 March 2023, Bangkok, Thailand

### The evolution of the PVS Pathway

the WOAHP programme to strengthen VS capacities

**Barbara Alessandrini**

Head, Capacity Building Department  
World Organisation for Animal Health

# Capacity building mission

---

Provide assessment and guidance to Members for **improving the sustainable governance and management of Veterinary Services**, in line with the WOAHA standards, and their leadership in health systems.

To do this, we use expertise and tested methodologies through the **PVS Pathway services and the Training Platform**.

We promote the dissemination of these results by facilitating communication to and amongst stakeholders, including partners, donors, public, private, and non-profit actors

PVS DIGITALISATION  
Stage 1  
Phase 1

1. Infrastructure of PVS Information System ready to host the different components

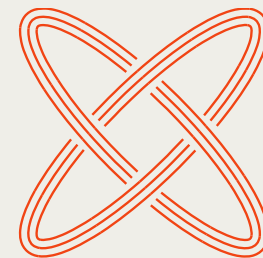

5. PVS quantitative and qualitative data available for analysis in transactional databases

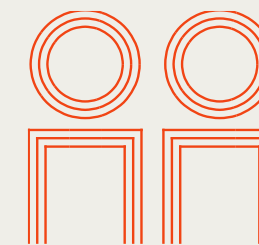

2. PVS reports are housed in a repository. Content accessible with permission (430 reports migrated)

6. PVS databases communicate with other WOAHP data and information systems

3. Simple web portal and login page  
PVS reports and quantitative data available according to user profile

7. Data migration is digitalised – no manual data entry

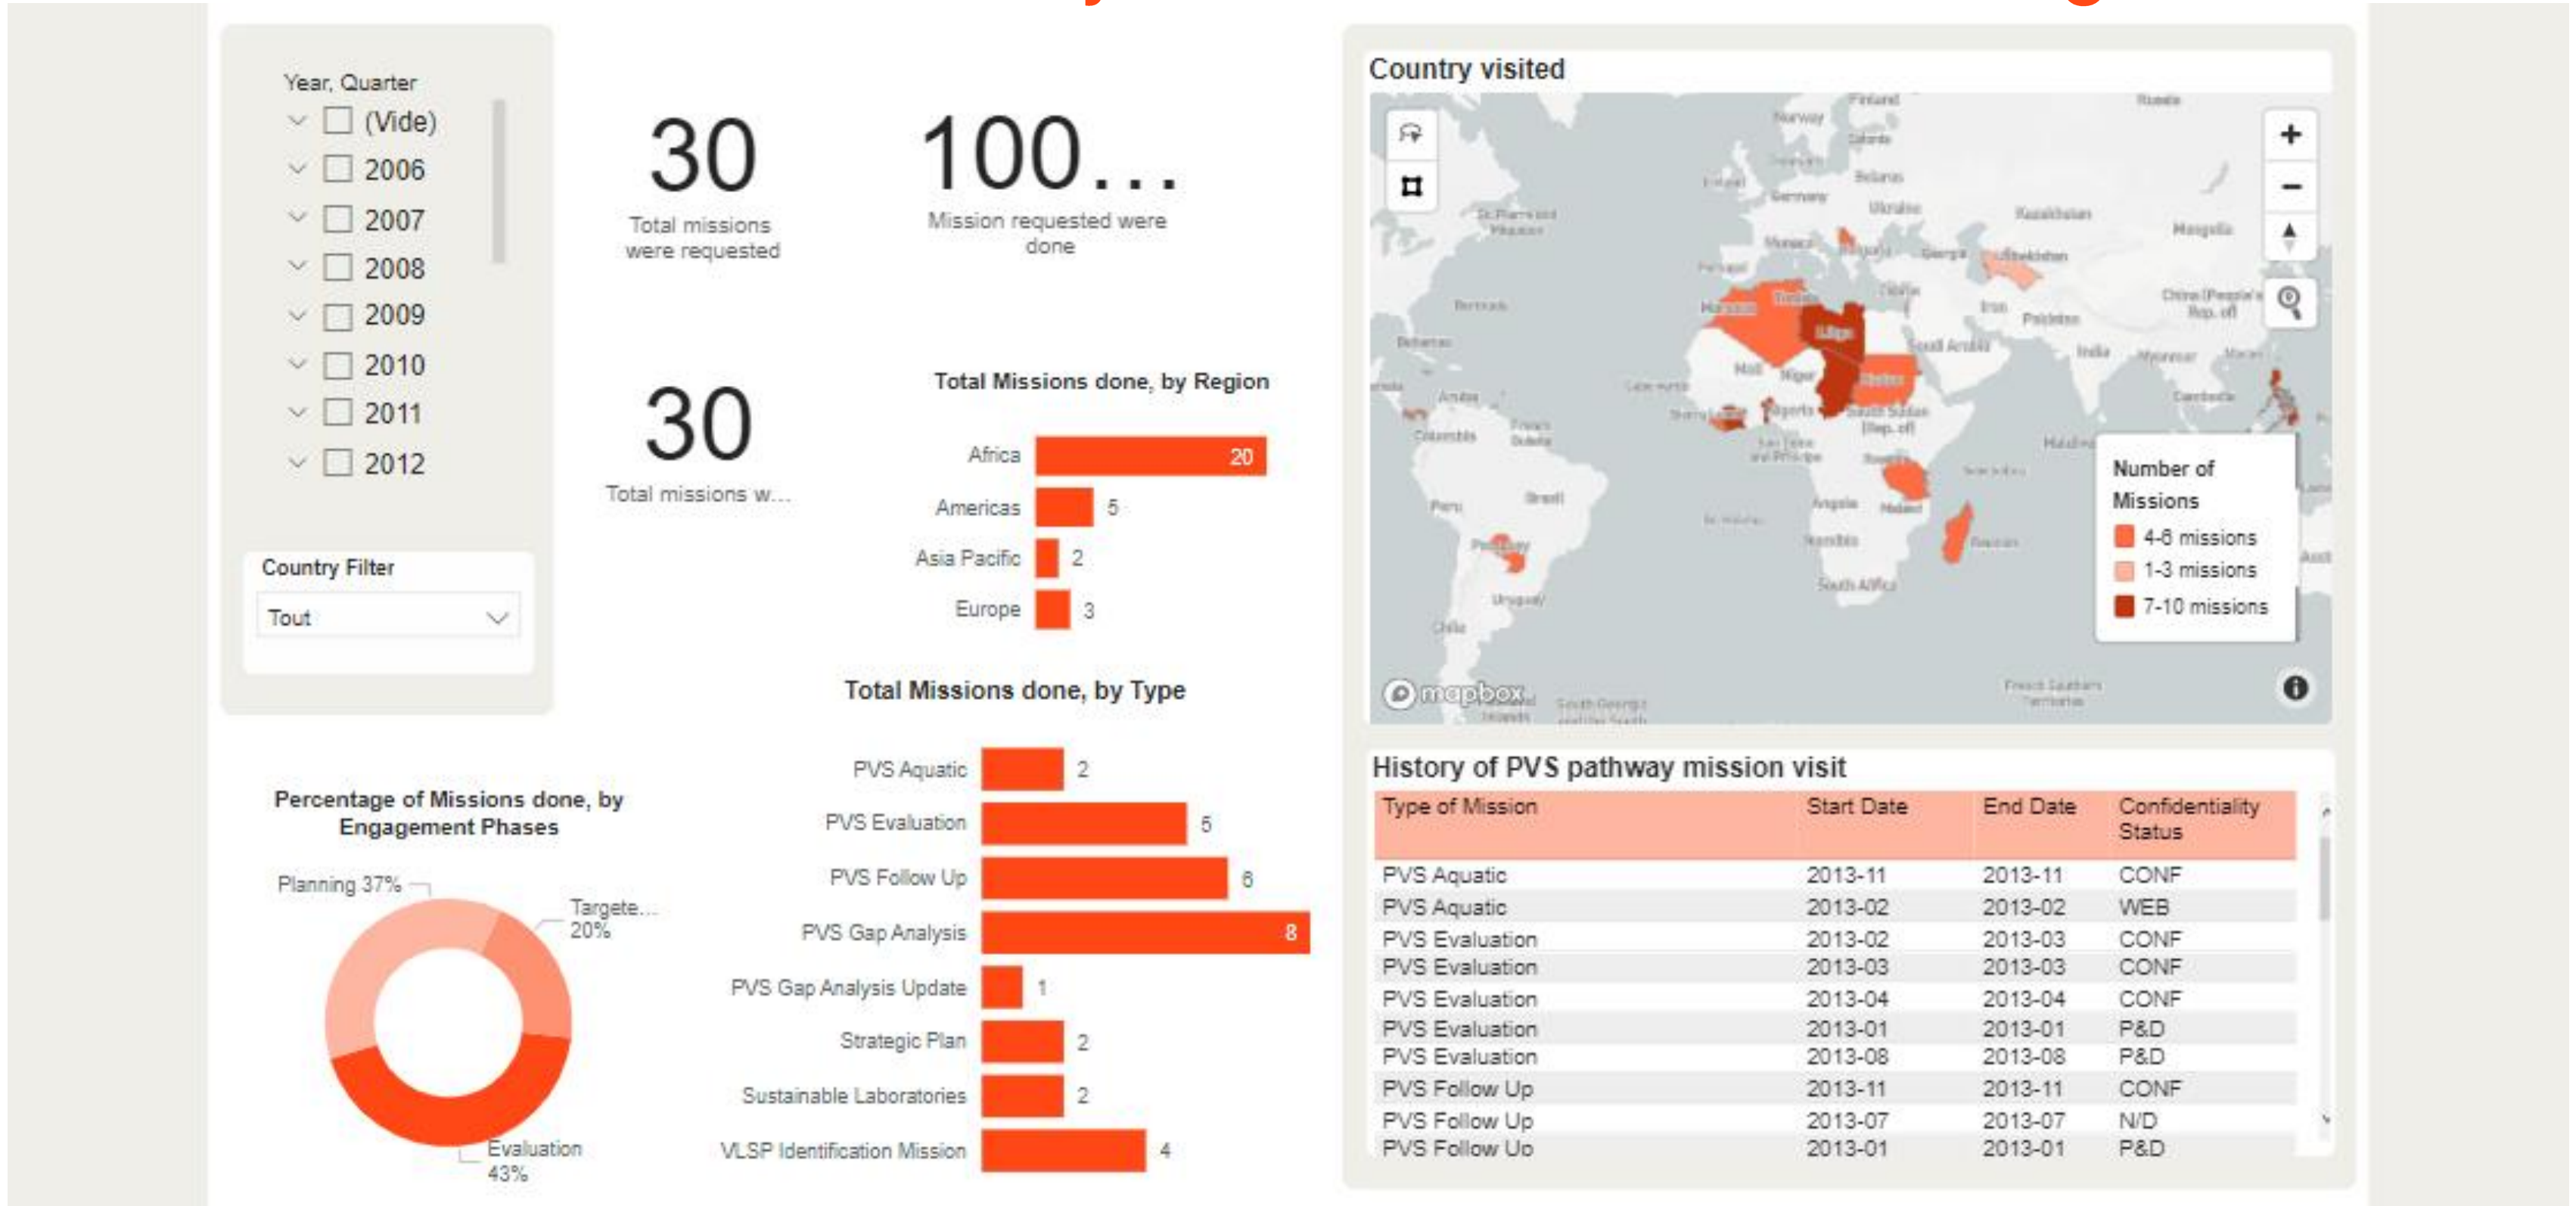

4. Search and view tool for documents and quantitative data  
Reports and contents searchable according to user profile

8. Quantitative analysis and dashboards available.  
Qualitative analysis and dashboards available  
(strengths, weaknesses, and recommendations of the PVS relevant CC to “One Health” thematic analysis from 2014-2019 and 2022-2023 PVS Evaluation and Follow-up reports)

# Interim PVS Pathway Dashboards – Global/Regional

# THANK YOU
