MVSSP

GOALS

1. Veterinary Services Management (VSM)

An effective and efficient national VS system that is strategic, well organized and coordinated

5 Priority Objectives (23 Critical Competencies)

2. Animal Health (AH)

A national VS that has the authority, capacity and capability to prevent, control and eradicate animal diseases (including zoonosis)

6 Priority Objectives (8 Critical Competencies)

3. Veterinary Public Health (VPH)

A national VS that uses veterinary science to protect human health by ensuring the safe production of food of animal origin

5 Priority Objectives (9 Critical Competencies)

4. Trade

A national VS that uses riskbased approaches to protect the country from disease

4 Priority Objectives (8 Critical Competencies)

1. Veterinary Services Management (VSM)

5 Priority Objectives

1A. To ensure adequate, appropriately allocated and competent veterinarians and veterinary paraprofessionals including delegation of specific official tasks to private veterinarians

1B. To strengt organisational sprovide an efficiency service.

1B. To strengthen and adapt the **organisational structure** in order to provide an effective and efficient veterinary service delivery system

1C. To ensure **sufficient funding** for operational, development and emergency purpose

1E. To ensure sustainable and effective implementation of **national policies and planning** on Veterinary Services

1D. To strengthen internal and external coordination and cooperation with relevant organisations and stakeholders

2. ANIMAL HEALTH (AH)

6 Priority Objectives

2A. To perform **Risk Analysis** on animal diseases (zoonotic and economic impact) of national importance

impact) of national importance

diseases

2C. To strengthen preparedness and response on emergency animal diseases (zoonotic and economic

> 2E. To strengthen the capacity and capability to diagnose existing, emerging re-emerging animal and

2B. To strengthen the passive active **surveillance programme** on animal diseases (zoonotic and of national economic impact importance

> 2D. To enhance the effectiveness of national animal disease prevention, control and eradication programmes

2F. To maintain and extend the scope of accreditation to all diagnostic tests needed on animal diseases (zoonotic and economic impact) of national importance

3. VETERINARY PUBLIC HEALTH (VPH)

5 Priority Objectives

3A. To Develop a specific overarching **policy** to strenghen monitoring and control of foodborne disease and contamination in food of animal origin

3C. To ensure similar sanitary level of all establishment that produce, process and distribute product of animal origin for human consumption that supply the national/local market.

> 3E. To ensure implementation of the national **plan** for AMR, including action surveillance and responsible and prudent use of antimicrobials in animal health and animal feed

3B. To ensure adequate ante and post mortem inspection for all producing meat abattoirs distribution in the national and local market.

> 3D. To enhance **regulation and control** of the distribution and use of veterinary drugs and biologicals, including antimicrobials

4. TRADE

4 Priority Objectives

4A. To strengthen and broaden the implementation of identification and **traceability systems** for animals, animal products animal feed and other veterinary products

diseases into the country

in order to prevent the introduction of

4B. To maintain existing specific **disease free** status and explore the establishment of disease free zones and compartments for export certification and trade purposes

4D. To promote and facilitate trade

agreements,

through sanitary 4C. To strengthen **risk based import equivalence** for trade purposes protocols and border security at gazetted and non-gazetted entry points
