Key ASF PREVENTION AND CONTROL ACTIVITIES

Main Challenges

- ✓ No compensation
- ✓ It is a new disease without vaccine
- ✓ Limitation of understanding of farmers in disease control
- ✓ Distribution of infect pig meat within outbreak area and other in the forms of fresh, dried and fermented
- ✓ High number of backyard farm in the country
- ✓ Limitation of government budgets to implements ASF control and response

- ✓ Staff capacity building especially on ASF control, prevention and response
- ✓ Strengthens the understanding of pig farms in disease control and biosecurity
- ✓ Improve knowledge on bio security practices in farm level, slaughterhouse and so on...
- ✓ Pilot ASF Compartmentalization, and education for all

Way Forward
