Contact persons for animal disease notification from non-WOAH members in the Pacific

WOAH National Focal Points for Animal Disease Notification.

Sub-regional Representation for Southeast Asia

SRR SEA

CHIBA (JAPAN)

World Organisation for Animal Health  
Founded as OIE

Australian Aid

## BACKGROUND

WOAH disease notification, including the use of WAHIS for WOAH National Focal Points for Animal Disease Notification training aims to provide good governance concepts for animal disease reporting amongst the participants. Participants are expected to understand the roles and responsibilities of WOAH National Focal Points for Animal Disease Notification to the WOAH in term of disease reporting. Contact persons for disease reporting for non-WOAH members at the Pacific countries will join the training.

## OBJECTIVES

- ❑ to train the focal points (FPs) to be important stewards in their respective countries/territories with respect to disease reporting,
- ❑ to inform FPs about reporting requirements and the nature of information using WAHIS application as well as to appropriately consult the system,
- ❑ to provide a forum for the FPs to interact with each other and WOAH staff, towards improving disease notifications across the region,
- ❑ to support the FPs in building and participating in networks at the national, sub-regional, regional, and global scales, and
- ❑ to train the FPs on the latest methods for reporting information at Member level using the WAHIS platform.
