- **Primary audience:** Veterinary Services, Wildlife Authorities, Public Health authorities, other Competent authorities with a mandate on animal health and welfare, public health, wildlife management and trade, law enforcement.

- **Disease of focus:** Any infectious pathogen at any interface across the spectrum of wildlife trade: Commercial and non-commercial, legal (both regulated and unregulated) and illegal wildlife trade.

- **Scope:** Wildlife includes wild animals and captive wild animals. Feral were out of scope.

Components of the guidelines

- Identification and engagement with stakeholders and experts
- Decision Making Frameworks in the Face of Complexity
- Risk Analysis
- Identification of disease risk management solutions and examples
- Establish Metrics for Monitoring and Evaluation (M&E)
- Overarching Concepts
 - Tools to identify critical capacity gaps and requirements
 - Advice on implementation, risk communication and training

Roll out of Guideline in the region

Pilot: Thailand

Workshop on Prioritization and Stakeholder Analysis

Objectives:

- To enhance knowledge for relevant stakeholders by sharing up-to-date WOAHA guidelines (e.g. Guidelines for Addressing Disease Risks in Wildlife Trade [expected publication 2024]).
 - To identify a Wildlife Trade Supply Chain or Interface for In-Depth Disease Risk Assessment and Reduction.
 - To identify stakeholders at the selected interface and conduct a stakeholder analysis
 - To increase communication and awareness among different stakeholders
- **Primary audience:** Veterinary Services, Wildlife Authorities,, wildlife management and trade, regulatory, etc

Workshop on Prioritization and Stakeholder Analysis

Expected Outcomes:

- Understanding by participants of disease risks in wildlife trade and management, including the stakeholders involved in their country.
- Main interfaces in selected trade activity identified.
- Key stakeholders and their responsibilities identified
- Improved knowledge on communication awareness

Workshop on Prioritization and Stakeholder Analysis

Session 2: The importance of understanding the wildlife trade and supply chain

- Prioritization:
 - Group 1: Meat trade (Deer species)
 - Group 2: Exotic pet trade (bird)
 - Group 3: Biomedical use (Long-tailed macaque)

Roll out of Guideline in the region

Pilot: Thailand

Risk assessment and
management

Step 6: Conduct risk analysis

Step 7: Identify risk management solutions

Step 8: Establish M&E

Step 9: Create action plan

Step 10: Final reporting

Process

- Includes 5 or more consultations and training for planning/facilitator team
- One workshop for prioritization and stakeholder analysis
- One 3 days workshop with larger group focused on risk analysis and management

Deliverable

- National Action Plan constituting risk management activities and M&E matrix
- Workshop report
- Support for implementation
- Overall evaluation to feed into the draft Guidelines

Thank you
