Allen et al. (2017) Nature Communications

Implementing global frameworks

Joint External Evaluation (JEE)

WHO Collaborative Surveillance

OIE WILDLIFE HEALTH FRAMEWORK 'PROTECTING WILDLIFE HEALTH TO ACHIEVE ONE HEALTH'

Quadripartite Memorandum of Understanding (MoU) signed for a new era of One Health collaboration

Quadripartite One Health Joint Plan of Action

Gaps in health security related to wildlife and environment affecting pandemic prevention and preparedness, 2007–2020

Catherine Machalaba,^a Marcela Uhart,^b Marie-Pierre Ryser-Degiorgis^c & William B Karesh^a

Among 107 countries:

No evidence of functional wildlife health surveillance program

Reported gaps in operations, coordination, scope, or capacity.

Wildlife health or zoonotic disease activities in published a National Biodiversity Strategy and Action Plan

Barriers to implementation

- ▶ Political will
- ▶ Resources
- ▶ Data generation
- ▶ Standards
- ▶ Communication and coordination
- ▶ Competing interest

Addressing implementation gaps

Wildlife Health Intelligence Network (WHIN)

WHIN meeting 2024 at FAO

WHIN meeting 2023 at WOA

Emerging community of practice of wildlife health surveillance actors from local, national and global scales

WHIN Vision

Every country has a structured and sustainable system to produce wildlife health intelligence

WHIN Core premise

Global wildlife health surveillance is
bigger than one single institution

Solution: Cross-sectoral bottom-up engagement

Global

- International organization
- National organizations with international mandates

National

- National Laboratories
- National Parks & Preserves
- Universities

Ministerial

- Livestock, Forestry, Animal Health, Environment Departments & Ministries

Provincial

- Provincial Offices
- Wildlife Rescue Centers/Zoos

Local

- Community Members
- Local NGOs
- International NGOs

Environmental

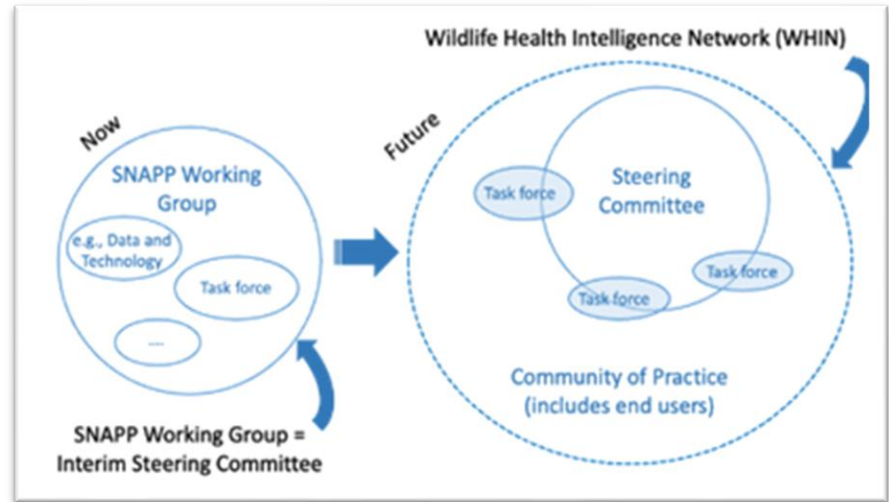

Animal Health

Human Health

WHIN

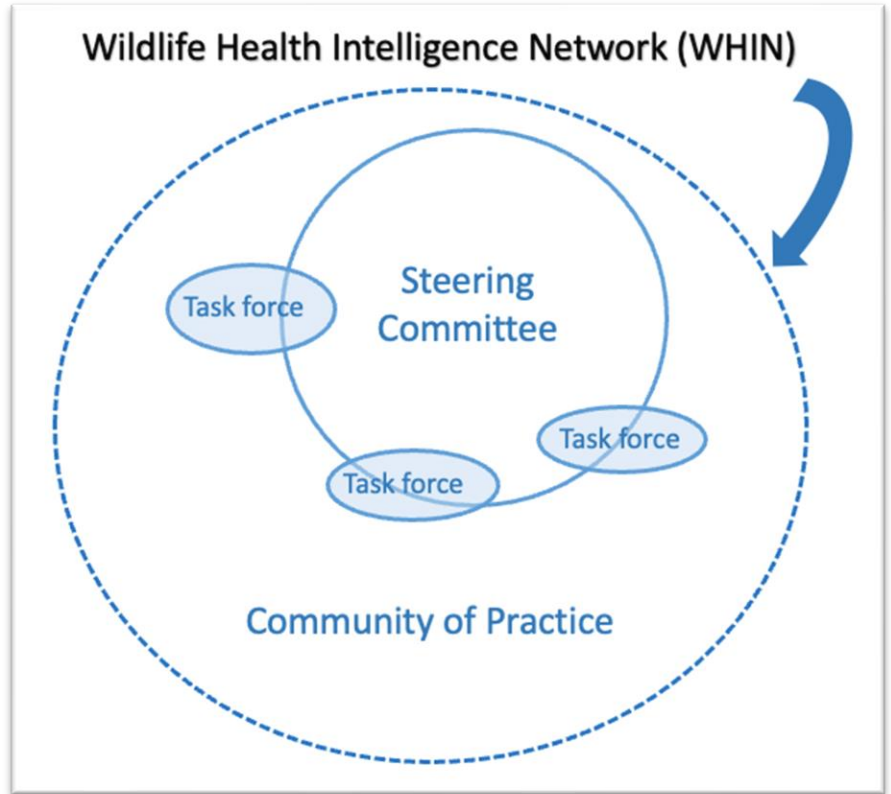

Steering committee is a leadership subgroup that makes decisions on overall directions of WHIN

Task Forces are thematic subgroups established to take up particular activities.

WHIN Task forces

- Data
- Field Implementation and capacity
- Advocacy and Outreach
- Indigenous and Local Communities
- Standards and Guidelines
- User-driven knowledge synthesis

WHIN Steering Committee

WHIN, meeting in Rome 2024

WHIN, meeting in Paris 2023

- Bernard Bett (*International Livestock Research Institute, OH Research, Education & Outreach Centre Africa*)
- Keren Cox-Witton (*Wildlife Health Australia - WHA*)
- François Diaz (*WOAH*)
- Damien Joly (*Canadian Wildlife Health Cooperative*)
- Susan Kutz (*Department of Ecosystem and Public Health at the Faculty of Veterinary Medicine, University of Calgary*)
- Nicholas Lyons (*FAO*)
- Oliver Morgan (*WHO*)
- Liz Paola Noguera Zayas (*University of Calgary*)
- Kim Pepin (*US Department of Agriculture National Wildlife Research Center*)
- Jonathan Sleeman (*US Geological Survey National Wildlife Health Center*)
- Sarin Suwanpakdee (*Mahidol University, MoZWE*)
- Marcy Uhart (*Karen C. Drayer Wildlife Health Center One Health Institute, University of California, Davis*)
- Kacey Yellowbird (*Samson Cree Nation*)

Wildlife Health Surveillance Systems
Globally

WHIN current activities

Working group participants on Zoom 2022

- 1) Decision tool for wildlife health surveillance objectives
- 2) Needs assessment tool
- 3) Building harmonized data model for wildlife health surveillance
- 4) Cost and benefits of WHS
- 5) Contributions of wildlife health to SDG

In-person meetings

Rome, 2024 (at FAO)

Paris, 2023 (at WOAAH)

September 2024

Wildlife Health Intelligence Network (WHIN)
