Yunnan Animal Science and Veterinary Institute,  
P.R.China

## Organisation's FMD Prevention and Control Activities

### Monitoring of FMD virus and antibodies

Since 2011 until now, continuous monitoring of foot-and-mouth disease virus and antibodies has been carried out in the border areas of Yunnan Province, and transmission risk analysis has been conducted.

### Research on FMD Diagnosis Techniques

- cELISA
- RT-PCR
- Real-time RT-PCR
- RT-LAMP
- RT-RAA

### FMD and other cross border animal disease training

In recent years, more than 200 veterinary technicians from Southeast Asian countries and Yunnan Province have been trained.
