

Poster Format Recommendations

- The poster will be displayed on a digital LED monitor (see page 2), with dimensions of 53 x 93.5 cm. The ideal poster size will be within those parameters, such as Size B2 (50 x 70.7), with a vertical alignment. A custom size poster of up to 53 x 93.5 cm is also possible.
- Please note that unlike previous conferences, there is **no need to print the poster**. Facilities for printing the poster will therefore not be available on-site.
- Please save the file in a high-resolution (more than 300 PPI or HD (1280x720)) digital format, into either PNG, JPG or PDF file. TIF and SVG formats can be used too.
- Recommended font size: Not less than **20 pt** (12-14 pt will be readable but small on the screen).
