

AQUATIC ANIMAL DISEASE REPORT - 2025														
Country/territory:	Australia													
Item	Disease status/occurrence code												Level of diagnosis	Epidemiological comment numbers
DISEASES PREVALENT IN THE REGION	Month													
FINFISH DISEASES	January	February	March	April	May	June	July	August	September	October	November	December		
WOAH-listed diseases														
1. Infection with epizootic haematopoietic necrosis virus	-(2024)	-(2024)	+(2025)	-(2025)	-(2025)	-(2025)	-(2025)	-(2025)	-(2025)				III	1
2. Infection with infectious haematopoietic necrosis virus	000	000	000	000	000	000	000	000	000					
3. Infection with spring viraemia of carp virus	000	000	000	000	000	000	000	000	000					
4. Infection with viral haemorrhagic septicaemia virus	000	000	000	000	000	000	000	000	000					
5. Infection with <i>Aphanomyces invadans</i> (EUS)	-(2022)	-(2022)	-(2022)	-(2022)	-(2022)	+(2025)	-(2025)	-(2025)	-(2025)				II	2
6. Infection with red sea bream iridovirus	000	000	000	000	000	000	000	000	000					
7. Infection with koi herpesvirus	000	000	000	000	000	000	000	000	000					
8. Infection with tilapia lake virus	000	000	000	000	000	000	000	000	000					
Non WOAH-listed diseases														
9. Grouper iridoviral disease	000	000	000	000	000	000	000	000	000					
10. Viral encephalopathy and retinopathy	-(2024)	-(2024)	+(2025)	+(2025)	-(2025)	-(2025)	-(2025)	-(2025)	-(2025)				III	3
11. Enteric septicemia of catfish	-(2014)	-(2014)	-(2014)	-(2014)	-(2014)	-(2014)	-(2014)	-(2014)	-(2014)				III	4
12. Carp edema virus disease	***	***	***											
MOLLUSC DISEASES														
WOAH-listed diseases														
1. Infection with <i>Banania exitiosa</i>	-(2019)	-(2019)	-(2019)	-(2019)	-(2019)	-(2019)	-(2019)	-(2019)	-(2019)				III	5
2. Infection with <i>Perkinsus olseni</i>	-(2022)	-(2022)	-(2022)	-(2022)	-(2022)	-(2022)	-(2022)	-(2022)	-(2022)				III	6
3. Infection with abalone herpesvirus	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)				III	7
4. Infection with <i>Xenohaliotis californiensis</i>	000	000	000	000	000	000	000	000	000					
5. Infection with <i>Banania ostraea</i>	000	000	000	000	000	000	000	000	000					
Non WOAH-listed diseases														
6. Infection with <i>Marteilioides chungmuensis</i>	000	000	000	000	000	000	000	000	000					
7. Acute viral necrosis (in scallops)	***	***	***	***	***	***	***	***	***					
CRUSTACEAN DISEASES														
WOAH-listed diseases														
1. Infection with Taura syndrome virus	000	000	000	000	000	000	000	000	000					
2. Infection with white spot syndrome virus	-(2024)	-(2024)	-(2024)	+(2025)	-(2025)	-(2025)	-(2025)	-(2025)	-(2025)				III	8
3. Infection with yellow head virus genotype 1	000	000	000	000	000	000	000	000	000					
4. Infection with infectious hypodermal and haematopoietic necrosis virus	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)	-(2024)				III	9
5. Infection with infectious myonecrosis virus	000	000	000	000	000	000	000	000	000					
6. Infection with <i>Macrobrachium rosenbergii</i> nodavirus (White tail disease)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)				III	10
7. Infection with <i>Hepatobacter penaei</i> (Necrotising hepatopancreatitis)	000	000	000	000	000	000	000	000	000					
8. Acute hepatopancreatic necrosis disease (AHPND)	000	000	000	000	000	000	000	000	000					
9. Infection with <i>Aphanomyces astaci</i> (Crayfish plague)	000	000	000	000	000	000	000	000	000					
10. Infection with decapod iridescent virus 1 (DIV1)	000	000	000	000	000	000	000	000	000					
Non WOAH-listed diseases														
11. Hepatopancreatic Microsporidiosis caused by <i>Lenterocytozoon hepatopenaei</i> (HPM-EHP)	000	000	000	000	000	000	000	000	000					
12. Viral covert mortality disease (VCMD) of shrimps	***	***	***	***	***	***	***	***	***					
13. <i>Neorhabdium eriocheirae</i> infection	***	***	***	***	***	***	***	***	***					
AMPHIBIAN DISEASES														
WOAH-listed diseases														
1. Infection with <i>Ranavirus</i> species	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)	-(2008)				III	11
2. Infection with <i>Batrachochytrium dendrobatidis</i>	-(2024)	-(2024)	+(2025)	-(2025)	-(2025)	-(2025)	-(2025)	-(2025)	-(2025)				III	12
3. Infection with <i>Batrachochytrium salamandrivorans</i>	000	000	000	000	000	000	000	000	000					
Prepared by:	Submitted by (WOAH Delegate):													
Name: Yuko Hood	Name: Dr Beth Cookson													
Position: Principal Science Officer, WOAH Focal Point for Aquatics	Positon: Australian Chief Veterinary Officer													
Date: 12/12/2025	Date: 12/12/2025													
ANY OTHER DISEASES OF IMPORTANCE

DISEASES PRESUMED EXOTIC TO THE REGION ^a			
LISTED BY THE WOAH			
Finfish: Infection with HPR-deleted or HPR0 salmon anaemia virus; Infection with salmon pancreas disease virus; Infection with <i>Gyrodactylus salaris</i> .			
Molluscs: Infection with <i>Marteilia refringens</i> ; <i>Perkinsus marinus</i> .			
NOT LISTED BY THE WOAH			
Finfish: Channel catfish virus disease			
^a Please use the following occurrence code:			
Occurrence code and symbol	Definition	Occurrence code and symbol	Definition
Disease present +	The disease is present with clinical signs in the whole country (in domestic species or wildlife)	Disease absent -	The disease was absent in the country during the reporting period (in domestic species or wildlife).
Disease limited to one or more zones +()	The disease is present with clinical signs, and limited to one or more zones/compartments (in domestic species or wildlife)	Never reported 0000	The disease has "never been reported" (historically absent) for the whole country in domestic species and wildlife.
Infection/infestation +?	Confirmed infestation or infection using diagnostic tests, but no clinical signs observed (in domestic species or wildlife)	No information ***	No information is available regarding the presence or the absence of this disease during the reporting period (in domestic species or wildlife).
Infection/infestation limited to one or more zones +?()	Confirmed infestation or infection using diagnostic tests, but no clinical signs observed and limited to one or more zones/compartments (in domestic species or wildlife)		
Disease suspected ?	The presence of the disease was suspected but not confirmed (in domestic species or wildlife)		
Disease suspected but not confirmed and limited to one or more zones ?()	The presence of the disease was suspected but not confirmed and limited to one or more zones/compartments (in domestic species or wildlife)		
^{b/} If there is any changes on historical data, please highlight in RED.			

1. Epidemiological comments:

(Comments should include: 1) Origin of the disease or pathogen (history of the disease); 2) Species affected; 3) Disease characteristics (unusual clinical signs or lesions); 4) Pathogen (isolated/sero-typed); 5) Mortality rate (high/low; decreasing/increasing); 6) Death toll (economic loss, etc); 7) Size of infected areas or names of infected areas; 8) Preventive/control measures taken; 9) Samples sent to national or international laboratories for confirmation (indicate the names of laboratories); 10) Published paper (articles in journals/website, etc). and 11) Unknown diseases: describe details as much as possible.)

Comment No.	
1	Epizootic haematopoietic necrosis was not reported this period despite passive surveillance in New South Wales (last reported March 2025), Victoria (last reported 2021), the Australian Capital Territory (last reported 2011), and South Australia (last reported 1992). Passive surveillance and never reported in the Northern Territory, Queensland, Tasmania, and Western Australia.
2	Infection with <i>Aphanomyces invadans</i> (EUS) was not reported this period despite passive surveillance in Queensland (last reported June 2025), New South Wales (last reported June 2022), Western Australia (last reported December 2021), the Northern Territory (last reported 2017), Victoria (last reported 2012) and South Australia (last reported 2008). Passive surveillance and never reported in Tasmania, and the Australian Capital Territory.
3	Viral encephalopathy and retinopathy was not reported this period despite passive surveillance in Queensland (last reported April 2025,) New South Wales (last reported May 2024), Western Australia (last reported January 2024), South Australia (last reported July 2023), the Northern Territory (last reported December 2021), and Tasmania (last reported April 2022). Never reported in Victoria, and the Australian Capital Territory.
4	Enteric septicemia of catfish (Infection with <i>Edwardsiella ictaluri</i>) was not reported this period despite passive surveillance. It has never been reported in New South Wales, South Australia, Victoria and Western Australia. No information available for this period in the Australian Capital Territory. It was reported from clinically normal fish from a single river in Queensland (last reported 2014), the only occurrence of <i>E. ictaluri</i> in wild fish populations in Australia. Active surveillance throughout Northern Australia has found no evidence of <i>E. ictaluri</i> in any other wild fish populations. <i>E. ictaluri</i> has been detected previously in association with imported ornamental fish including: in a closed aquarium in the Northern Territory (last reported 2011), and in PC2 containment facilities in both Tasmania (last reported 2001) and Queensland (last reported 2008).
5	Infection with <i>Bonamia exitiosa</i> was not reported this period despite targeted surveillance in Western Australia (last reported 2017), passive surveillance in South Australia (last reported 2019) and Victoria (last reported 2016). Passive surveillance and never reported in Queensland, New South Wales, Tasmania and the Northern Territory. No information available for the Australian Capital Territory (no marine water responsibility).
6	Infection with <i>Perkinsus olseni</i> was not reported this period despite passive surveillance in South Australia (last reported April 2022), New South Wales (last reported 2005), Victoria (last reported 2015), Queensland (last reported 2014) and Western Australia (last reported 2021). Passive surveillance and never reported in the Northern Territory and Tasmania. No information available for the Australian Capital Territory (no marine water responsibility).
7	Infection with abalone herpesvirus (abalone viral ganglioneuritis) was not reported this period despite, passive surveillance in South Australia (last reported in December 2024), Victoria (last reported August 2023), New South Wales (last reported May 2021), Tasmania (last reported 2011). Passive surveillance and never reported in the Northern Territory, Queensland, and Western Australia. No information available for the Australian Capital Territory (no marine water responsibility).
8	Infection with white spot syndrome virus (white spot disease) was not reported this period despite active surveillance and passive surveillance in New south Wales (last reported April 2025), Queensland (last reported April/May 2020), Never reported despite passive surveillance in South Australia, Western Australia, the Northern Territory, Victoria, Tasmania, and the Australian Capital Territory.
9	Infection with infectious hypodermal and haematopoietic necrosis virus was not reported this period despite passive surveillance in the Northern Territory (last reported September 2024), Queensland (last reported April 2020). Passive surveillance and never reported in New South Wales, South Australia, Victoria and Western Australia. No information available for the Australian Capital Territory (no marine water responsibility) and Tasmania (susceptible species not present).
10	Infection with <i>Macrobrachium rosenbergii</i> nodavirus (white tail disease) was not reported this period despite passive surveillance in Queensland (last reported 2008). Passive surveillance and never reported in the Australian Capital Territory, New South Wales, the Northern Territory, South Australia, Victoria, and Western Australia. No information available this period from Tasmania (susceptible species not present).
11	Infection with Ranavirus species was not reported this period despite passive surveillance in the Northern Territory (last reported 2008, prior to official reporting for Ranavirus), Queensland (last reported 1992). Passive surveillance and never reported in New South Wales, Victoria, South Australia, Western Australia, Tasmania, and the Australian Capital Territory.
12	Infection with <i>Batrachochytrium dendrobatidis</i> 1. Reported by Victoria in September based on passive surveillance 2. Species affected – Victoria – Unknown 3. Clinical signs – Victoria – Not available 4. Pathogen – <i>Batrachochytrium dendrobatidis</i> 5. Mortality rate – Victoria – Unknown 6. Economic loss – Not applicable 7. Geographic extent – Victoria – Not available 8. Containment measures – Not applicable 9. Laboratory confirmation – Victoria PCR at CEASR 10. Publications – Nil Infection with <i>Batrachochytrium dendrobatidis</i> was not reported in this quarter but is considered endemic to South Australia (last reported June 2025), New South Wales (last reported December 2024), Queensland (last reported January 2023), Tasmania (last reported October 2022), and

2. New aquatic animal health regulations introduced within past six months (with effective date):
