Beyond Silos Project – ASEAN Component

Monitoring and Evaluation

Dr Ashish SUTAR
Capacity building coordinator, WOAH SRR SEA

Workshop on Biothreat Reduction in South-East Asia

02-June-2026

WOAH SRR SEA

World Organisation for Animal Health

In partnership with Canada

ULTIMATE OUTCOME					
Change in state, conditions or well-being for ultimate beneficiaries (e.g. reduced threat to populations from CBRN materials)	Reduced threats to the global community from deliberate or accidental release of biological agents				
INTERMEDIATE OUTCOMES Change in behaviour, practice or performance of Intermediaries (e.g. improved performance through the use of training or tools provided)	Veterinary Services are more engaged in **national and international security initiatives**	Improved capacity of Veterinary Services to support **multisectora**l prevention, preparedness, early detection, and response to deliberate or accidental release of pathogens			
	Engagement and advocacy	Communication	Training and Exercising	Assessment	Biological Risk Management
IMMEDIATE OUTCOMES Change in capacities of intermediaries (e.g. increased knowledge or awareness, better access to tools	Increased contribution of Veterinary Services to non-proliferation and security activities	Adoption of the narrative that Veterinary Services make an important contribution to security	Improved capacity of Veterinary Ser-vices to investigate and respond to events, which are suspicious of intentional release, in partnership with other sectors	Greater awareness about the biological threat landscape	Improved biological risk management along the pathogen value chain to reduce risks from deliberate use of pathogens or laboratory accidents
