Member Report

SEACFMD Campaign Progress

Laphinh Phithacthep

Director, Division of Veterinary Services
Department of Livestock and Fisheries
Lao PDR

28th SEACFMD Sub-Commission Meeting
28 – 30 July 2026, Ulaanbaatar, Mongolia

FMD situation in 2025 and 2026

- No FMD clinical report from the field.

FMD Vaccine Importation

- imported FMD vaccine from Near by countries such as Thailand, China and Vietnam, Argentina...
- approximately 2,421,200 doses.

Government purchased 125,800 doses,

Donor purchase 54,600 doses

Private sector(commercial farms, traders...) 2,241,000 doses.

FMD Vaccination Report 2025

Province	Number Animals vaccinated							
	Cattle		Buffalo		Pig		Sheep/ Goat	
	Population	Vaccinated	Population	Vaccinated	Population	Vaccinated	Population	Vaccinated
Attapeu	49,297	15,833	32,295	10,346	33,607	11,091	12,056	3,101
Bokeo	144,244	73,492	24,777	10,359	82,921	19,738	29,656	15,436

support the Regional Animal Movement Pathway and Value Chain Study

- With supporting expertise, experts and budget DLF conducted the Regional Animal Movement Pathway and Value Chain Study

Developing Diseases Reporting System

- DLF by support from FAO and Chieang Mai University are developing the Lao Animal Health Information System(LAHIS)
- Planning to do pilot project in some districts of Luang Prabang the Salavan and Xayabuly later

04 V5

ລະບົບລາຍງານຂໍ້ມູນພະຍາດສັດ
Lao Animal Health Information System

TCP program for emergency response for FMDV SAT1

Surveillance and early warning systems for earlier detection and faster confirmation

- Providing technical guidance and support to target countries to assess risk pathways
- Conducting a regional training on Rapid Risk Assessment (RRA)
- Providing technical advice for risk-based surveillance design targeting high-risk zones
- Conducting a regional virtual training on clinical and outbreak investigation, sample collection
- Providing support to risk communication and awareness raising campaign at national levels

Enhanced laboratory diagnostic

- Conduct virtual training for national reference
- Providing emergency supplies to national and regional reference laboratories
- Facilitate coordination and collaboration with regional reference laboratories
- Providing support for the participation of laboratories in the target
- Support the regional reference laboratory in ASEAN (Thailand) to establish a regional FMD proficiency testing scheme (PTS)

Zoning approach

FMD Free Zone:

- Quarantine station inside the free zone
- 30 days quarantine before export
- Routine clinical examination of animals
- 10% blood sample collection for LPB ELISA test
- 30 sentinel animals
- NSP and Probang testing

Buffer Zone:

- Covers 22 villages with over 1800 cattle and buffaloes
- FMD Vaccination and post vaccination monitoring practiced
- 10% blood samples every 3 months for NSP test

Collection Zone:

- There are collection farms inside this zone
- 45 days quarantine before moving to quarantine zone
- Ear tagging with HS, FMD and LSD vaccination 2 time(day 0 to 4 and after 30 – 35 days
- Routine clinical examination

The evaluation of implementation quarantine the slaughter bovine to export from Lao to China

- During June 23 to July 01, 2026, DLF invited China expert mission included authority from MARA and GACC of China to visit and conduct the evaluation of implementation quarantine

Key challenges and lessons learnt

- High price of FMD vaccine, only few death making less interest of farmers to vaccinate their animals
- Lack of funding and equipment for field operational work
- Delay or under-reporting.
- Free range production system poses challenges e.g vaccination, disease spread, reporting
- Improve public awareness, implement biosecurity practices.
- Illegal Animal and animal products movement both in country and cross border

Proposed Priority Actions

- Improve surveillance and disease reporting system
- Develop and train existing and the new workforce at the local level
- Capacity building ,training of Veterinary Paraprofessionals and Village Veterinary Workers (VVs)
- Enhance public awareness and risk communication for FMD high risk areas
- Explore good quality FMD vaccine with cheaper price
- Advocacy to allocate budget and resources for the implementation of Risk Based Strategic Plan (RBSP)

Thank You
