LIVESTOCK AND POULTRY POPULATION IN VIETNAM IN 2025

Indicator	Population in 2025	Change Compared with 2024
Pig population	31.4 million head	Increased by 0.6%
Poultry population	584.9 million head	Increased by 3.0%
Buffalo population	1.95 million head	Decreased by 3.9%
Cattle population	6.14 million head	Decreased by 1.2%
Dairy cattle population	321,800 head	Decreased by 1.2%

VIETNAM'S LIVESTOCK PRODUCTION IN 2025

Indicator	2025 Results	Compared with 2024
Total meat production (live weight)	Approx. 8.66 million tonnes	↑ 4.3%
Pig meat production (live weight)	Approx. 5.39 million tonnes	↑ 3.9%
Poultry meat production (live weight)	Approx. 2.60 million tonnes	↑ 5.9%
Beef production (live weight)	Approx. 499.1 thousand tonnes	↑ 1.7%
Buffalo meat production (live weight)	Approx. 125.2 thousand tonnes	↓ 0.1%
Poultry egg production	Approx. 21.4 billion eggs	↑ 5.3%
Fresh cow's milk production	Approx. 1.3 million tonnes	↑ 5.5%

ANIMAL DISEASE STATUS IN 2025

2025	Number of Outbreaks	Number of provinces	Compared with 2024
FMD	19	11	↓ 75%
ASF	2,782	34	↑ 13 times
PPRS	1	1	Effective disease control
AI	58	16	↑ 3 times

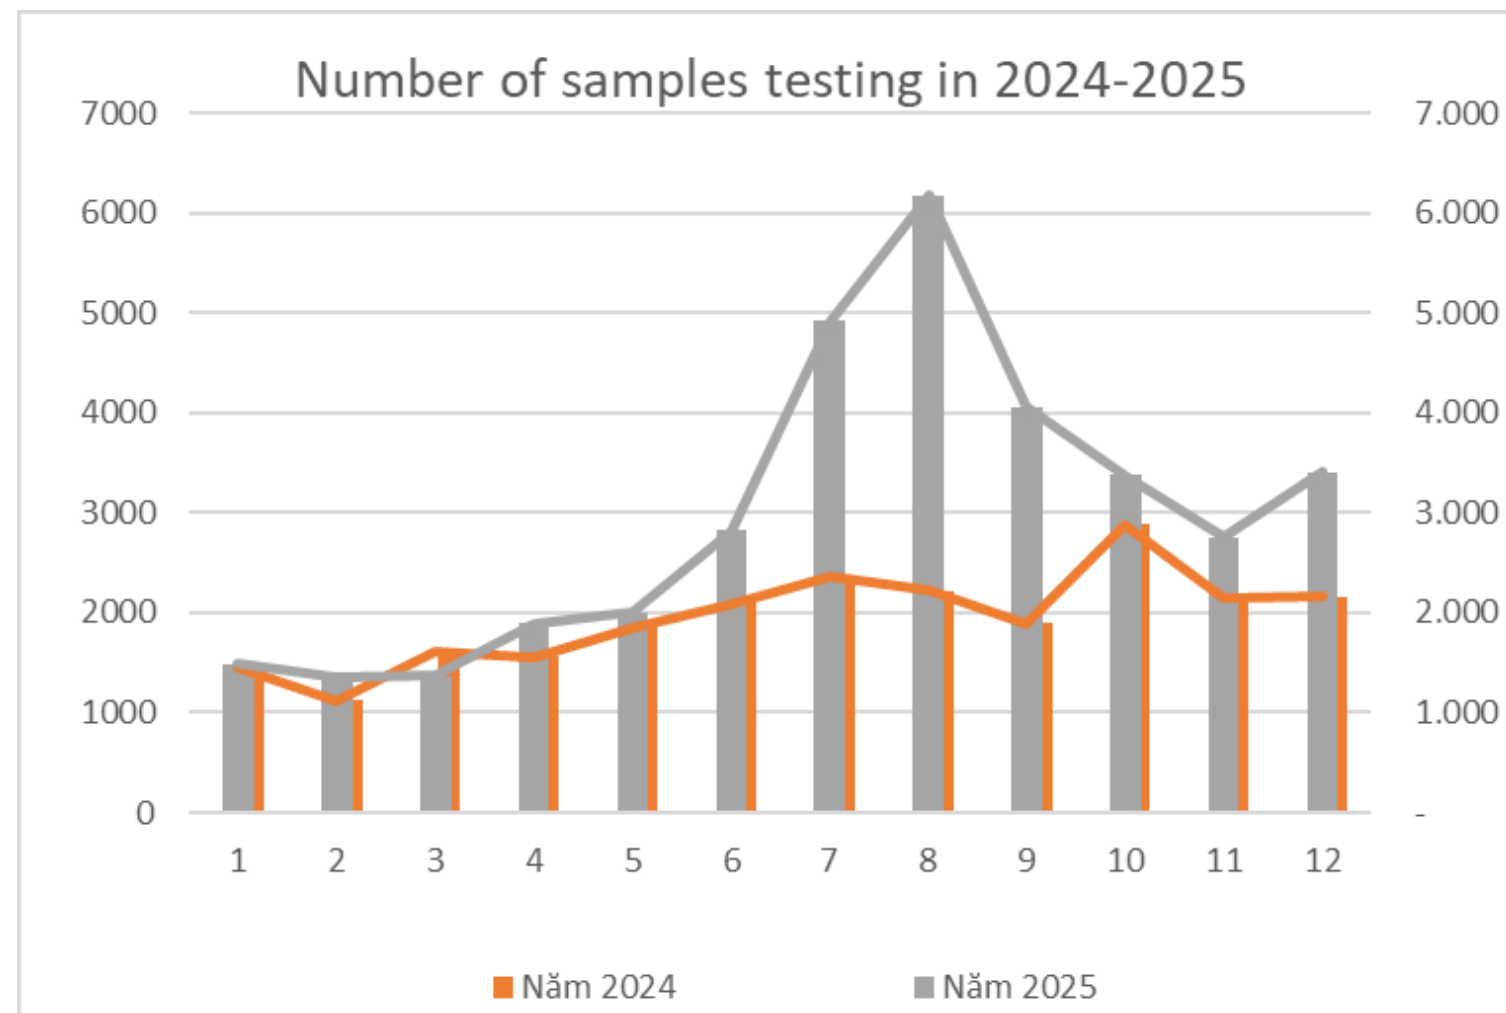

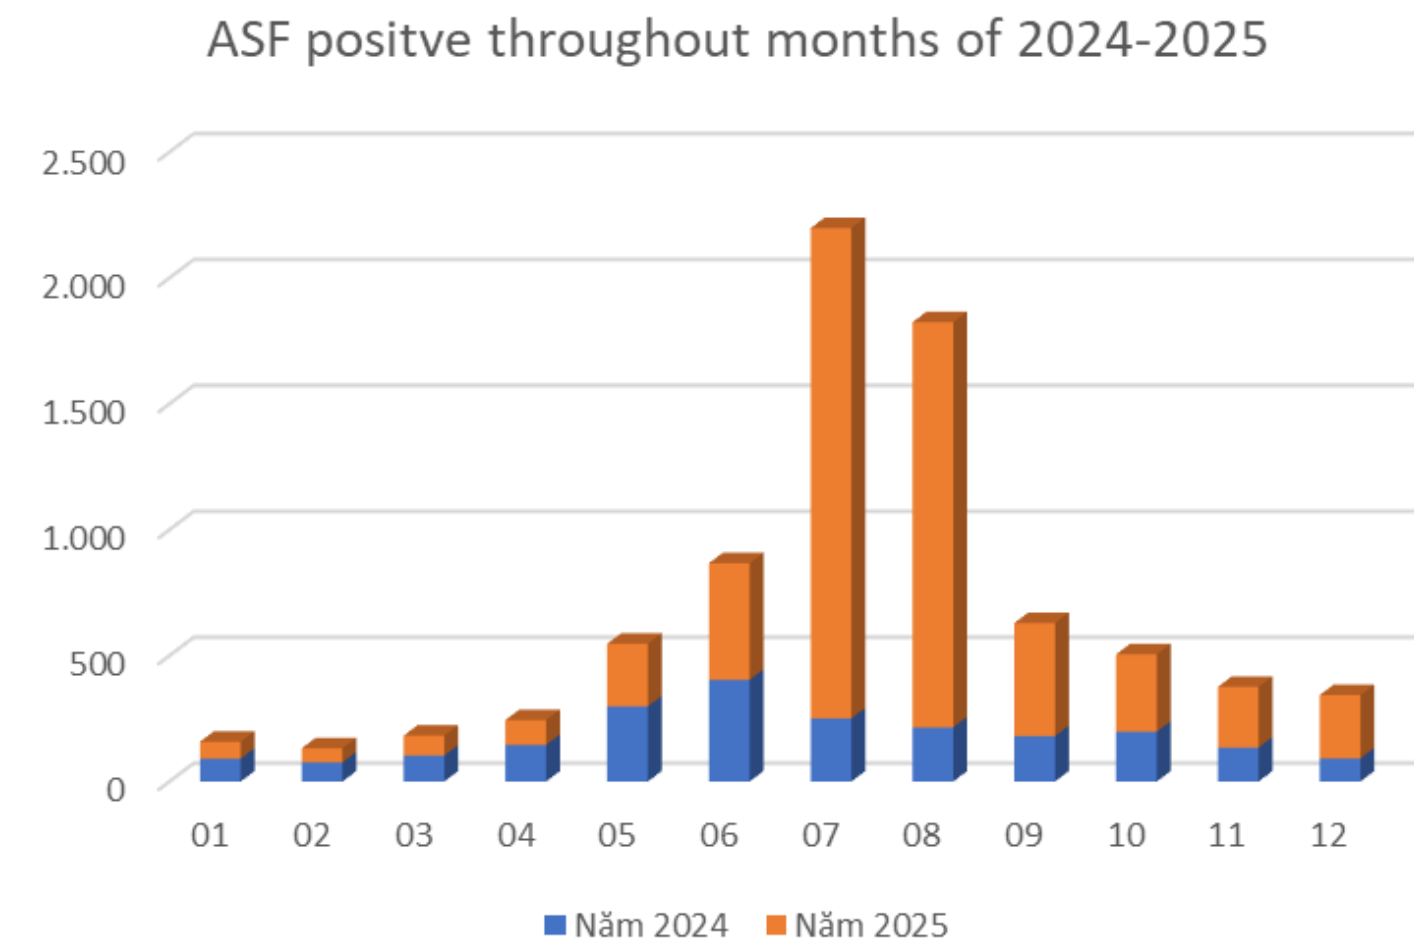

African Swine Fever (ASF)

Number of outbreaks	2,782 outbreaks across 34 provinces
Deaths / animals culled	1,273 pigs <i>Approximately 13 times higher than in 2024</i>
Vaccination	16 provinces/cities; approx. 630,516 vaccine doses administered
Surveillance	(+) 4,309/37,294 samples (11.55%)

	2024	2025
Number of swine testing	27,189	39,121
ASF samples testing	23,349	35,614
ASF pos	2,186	5,817

ASF SEQUENCING RESULTS DURING 2023-2025

	2023	2024	2025
Number of Sequencing	56	127	253
Number of genotype II	44	81	57
Number of genotype I+II	12	46	196

Map of the circulation of genotype II and recombinant I+II in Vietnam from 2023 to 2025.”

Porcine Reproductive & Respiratory Syndrome (PRRS)

Outbreak situation	At the beginning of the year, outbreak was detected in Bac Lieu, involving 1 infected pig => The affected animal was immediately culled => The outbreak was effectively controlled.
From January 2025 to March 2026	Only sporadic cases/outbreaks were reported.

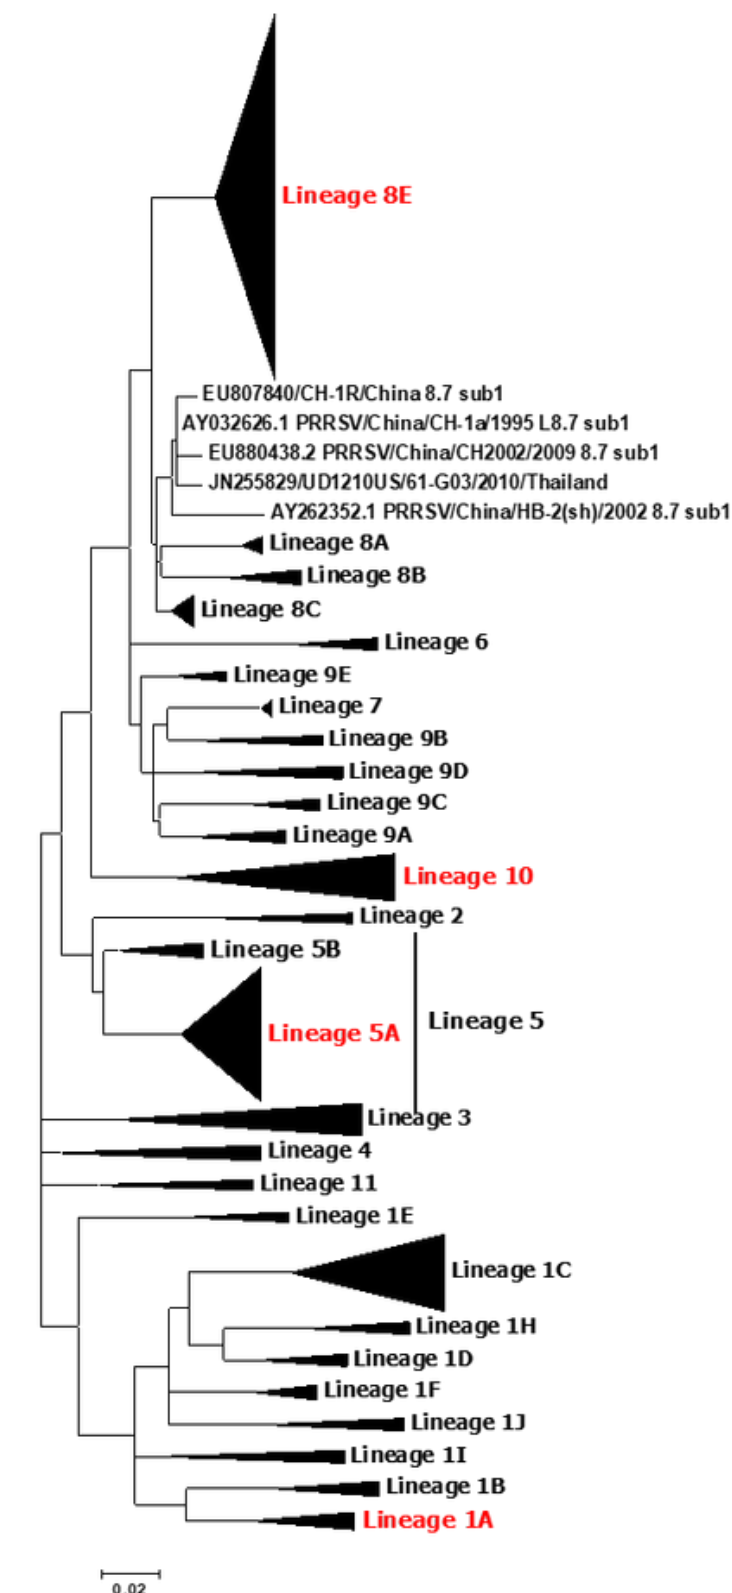

THE NUMBER OF SAMPLES TESTED FOR PRRSV DURING 2022–2025

Year	No. of samples for testing Swine diseases	No. of samples for testing PRRSV	No of samples for positive PRRSV
2022	27,163	900	33
2023	24,937	2,387	60
2024	21,301	2,522	53
2025	37,303	1,942	128

GENE SEQUENCING RESULTS JANUARY 2025 – MARCH 2026

Serotype (Subtype)	Number of Samples	Percentage (%)
L1 (L1A)	3	9.1%
L5 (L5A)	4	12.1%
L8 (L8E)	22	66.7%
L10	4	12.1%
Total	33	100%

*Phylogenetic tree of PRRSV
in Vietnam in 2025 to Mar.*

2026

13 – 16 October, 2026 Beijing, China
