

SLIDE 1 OF 9 · ABOUT THIS SLIDE

About this deck: a short contribution (about 10 minutes) to the Quadripartite sharing session. Examples of how FAO, WOAH, UNEP and WHO communicate together, with one practical point for focal points on each slide.

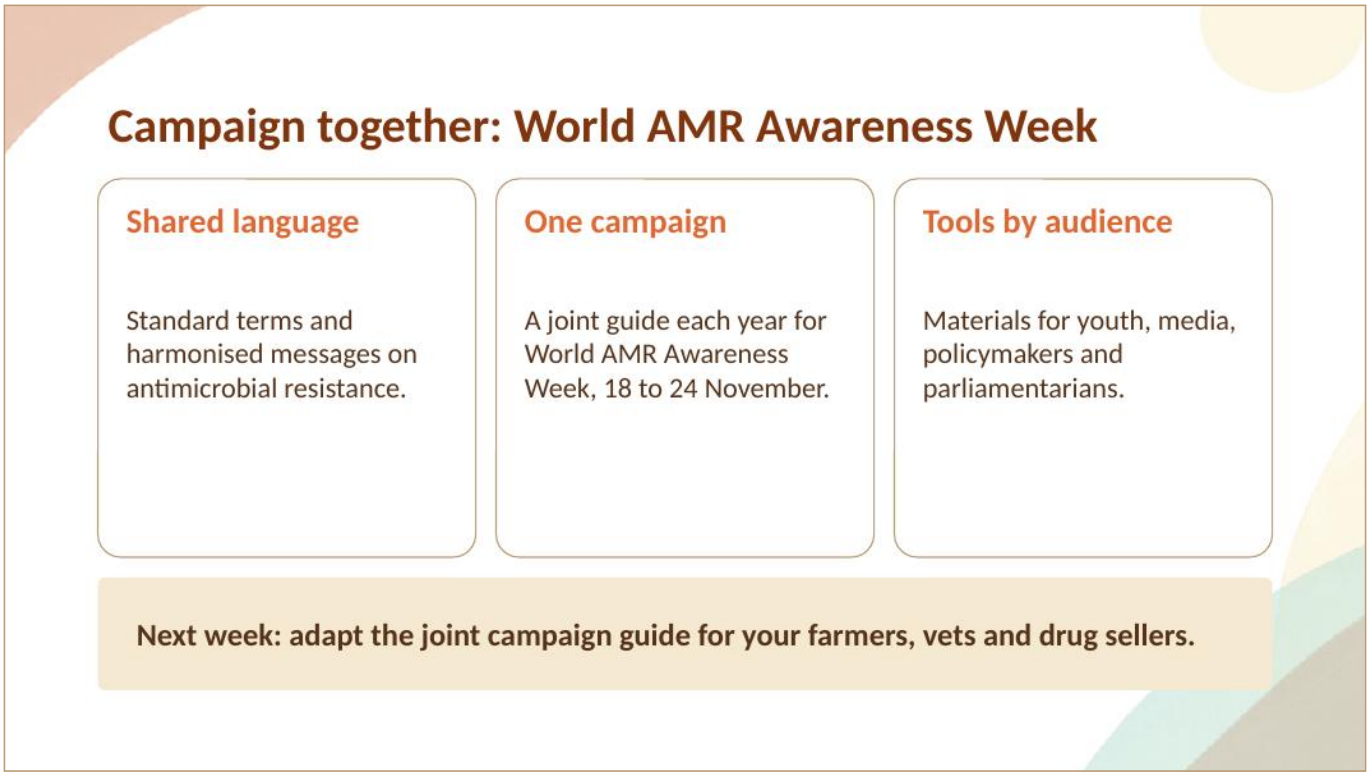

SLIDE 2 OF 9 · ABOUT THIS SLIDE

About this slide: the Quadripartite brings together FAO, UNEP, WHO and WOAH. The One Health Joint Plan of Action (2022 to 2026) aims to strengthen collaboration, communication, capacity building and coordination across all sectors. The renewed memorandum of understanding runs until 28 November 2030.

SLIDE 3 OF 9 · ABOUT THIS SLIDE

About this slide: three joint products that help agencies say the same thing. The joint FAO, WHO and WOAH H5 assessment (latest 18 May 2026) rates the global public health risk as low, and notes it may change quickly. The Joint Risk Assessment Operational Tool helps Members assess a zoonotic risk together. The Tripartite Zoonoses Guide covers coordination, communication and collaboration, including risk communication and community engagement.

SLIDE 4 OF 9 · ABOUT THIS SLIDE

About this slide: the Quadripartite Working Group on AMR Awareness was set up in May 2022. It develops standard language and harmonised messages on antimicrobial resistance (AMR), coordinates World AMR Awareness Week, and produces tools for audiences such as youth, media and policymakers. The four agencies jointly produced the 2026 campaign guide.

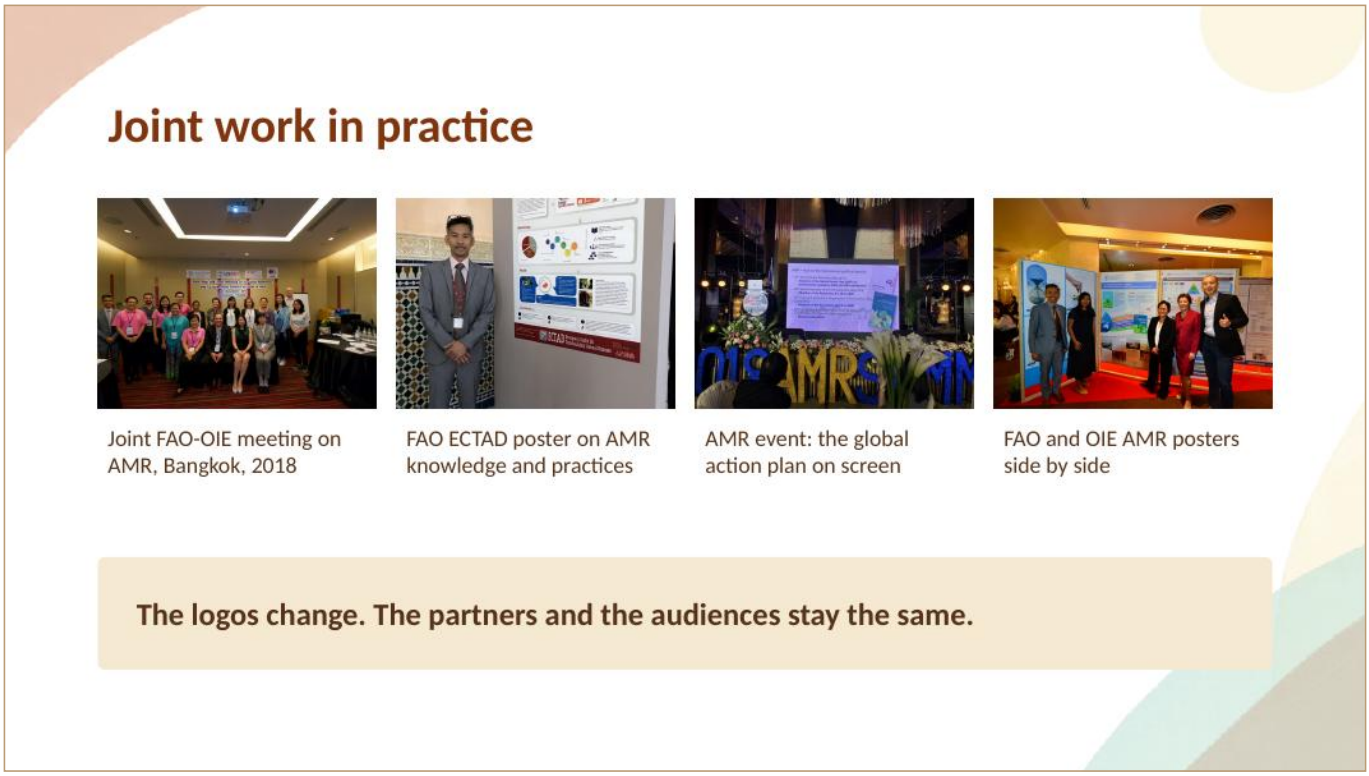

SLIDE 5 OF 9 · ABOUT THIS SLIDE

About this slide: regional and country examples. The Asia-Pacific Quadripartite has run regional One Health workshops since 2023; its secretariat is currently hosted by the UNEP Regional Office for Asia and the Pacific. National bridging workshops, such as Malaysia's, are organised jointly by the health and veterinary ministries with the regional Quadripartite. Indonesia's Pandemic Fund project (CARE-I) has FAO, the World Bank and WHO as implementing entities and includes One Health risk communication.

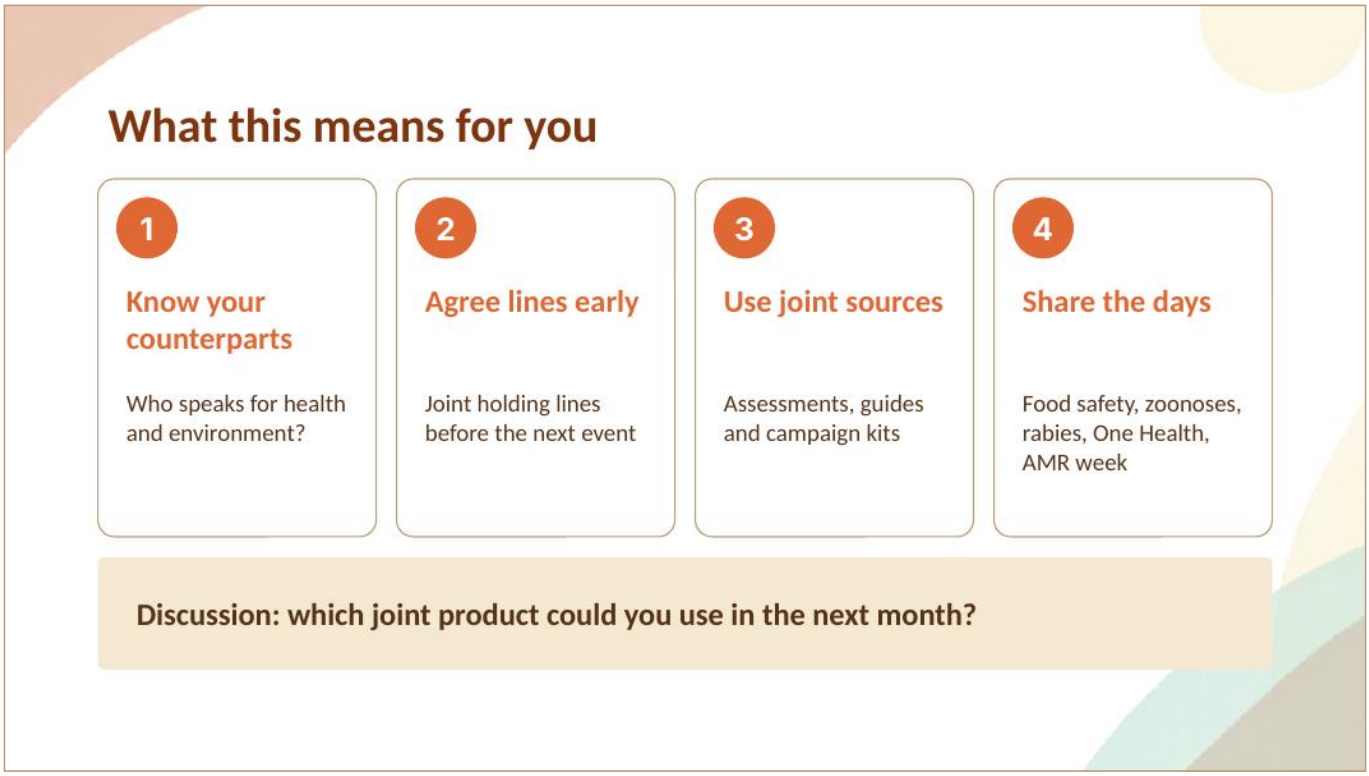

SLIDE 6 OF 9 · ABOUT THIS SLIDE

About this slide: examples of joint work from Dr Domingo Caro III's time with FAO. Work on One Health and antimicrobial resistance (AMR) with the Tripartite (FAO, WOAH, WHO) and later the Quadripartite (adding UNEP); with WOAH on the Standing Group of Experts on African swine fever (ASF); with WHO on avian influenza and other zoonotic diseases; and joint awareness days. In the session, Dr Caro shared personal experience of two areas of Quadripartite coordination: the technical clearance of messages before release, and the coordination of international days and joint campaigns.

SLIDE 7 OF 9 · ABOUT THIS SLIDE

About this slide: photos from Dr Domingo Caro III's FAO work. Left to right: the First FAO-OIE Joint Meeting of Regional Reference and Collaborating Centres on AMR in Asia (Bangkok, 23 November 2018); During the Global Conference on Antimicrobial Resistance in Marrakesh, Morocco, from 29 to 31 October 2018. Dr Caro presented an FAO ECTAD poster on an enhanced knowledge, attitudes and practices (KAP+) assessment on antimicrobial resistance and use; an AMR event in the Philippines during the World Antimicrobial Awareness Week in 2018; FAO colleagues during the World Antimicrobial Awareness Week in Thailand in front of FAO and OIE AMR posters.

SLIDE 8 OF 9 · ABOUT THIS SLIDE

About this slide: practical steps for communication focal points. Joint days include World Food Safety Day (7 June), World Zoonoses Day (6 July), World Rabies Day (28 September), World One Health Day (3 November) and World AMR Awareness Week (18 to 24 November).

SLIDE 9 OF 9 · ABOUT THIS SLIDE

About this slide: presenter and contact details. Dr Domingo Caro III, Padayon Communications (jim.caro@padayoncommunications.com, www.padayoncommunications.com). The main message of the session: joint work between FAO, WOAH, UNEP and WHO depends on relationships, shared sources and agreed messages that are in place before an emergency.
