
Human health
does not exist
in a vacuum

WESTERN PACIFIC

One Region, One Health

A joint Quadripartite approach to complex health challenges in the Western Pacific

Applying the One Health approach across the Western Pacific →

Malaysia

Multisectoral actions to combat antimicrobial resistance (AMR)

Strengthening AMR outbreak response in hospitals

WHO leveraged support from WHO Collaborating Centre for AMR surveillance and research — the National Institute of Infectious Diseases, Japan Institute for Health Security — to develop and conduct an AMR outbreak response training for referral hostpitals, as well as update national guidelines.

Advancing AMR surveillance

WHO, along with other One Health Quadripartite members, led a national AMR surveillance workshop that enabled cross-sectoral coordination, standardisation, and data sharing .

Rallying political support for AMR action

Together with the One Health Quadripartite, WHO led multisectoral communication workshops to advocate and garner political support for AMR actions.

Joint action on Nipah virus

Raise awareness

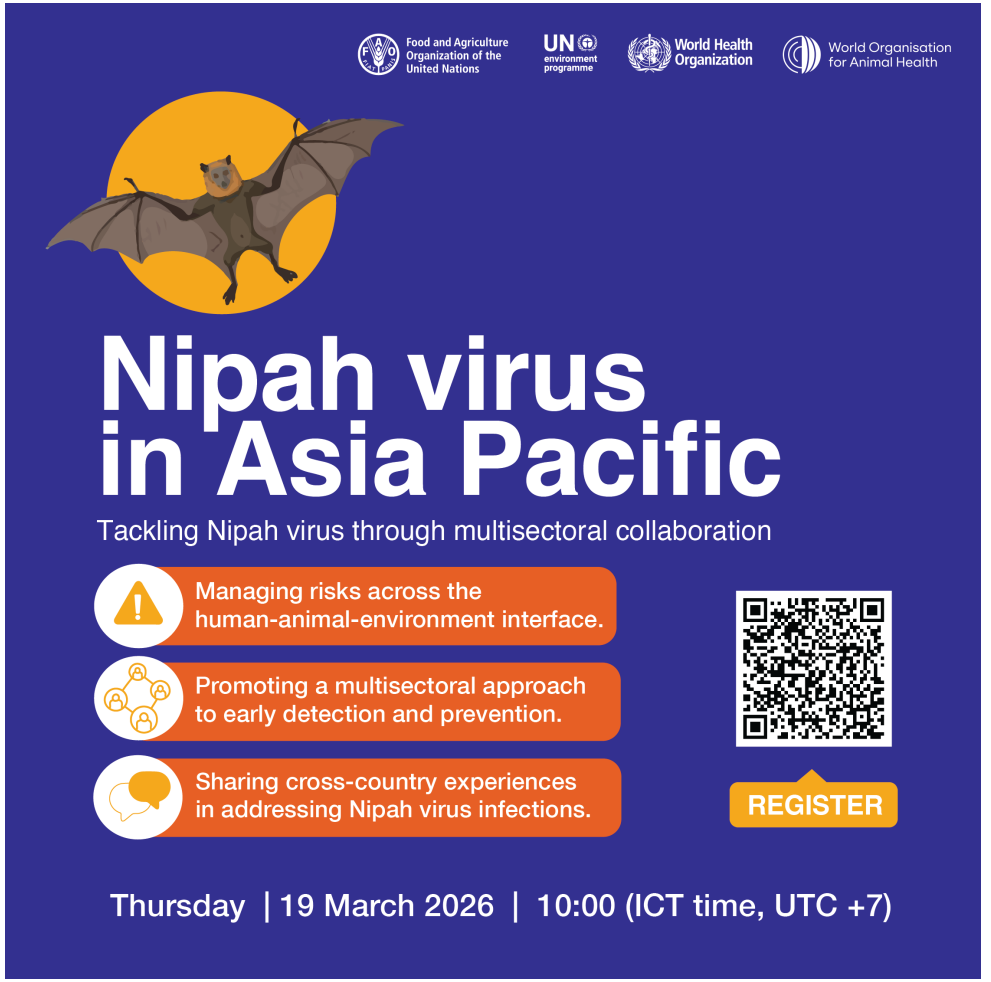

Awareness raised on the situation and risks at the human-animal-environment interface of Nipah virus in the Asia Pacific Region.

Share experience

Enabling exchange of local, national and regional experiences, challenges and good practices in addressing Nipah virus infection in humans and animals.

Connect experts

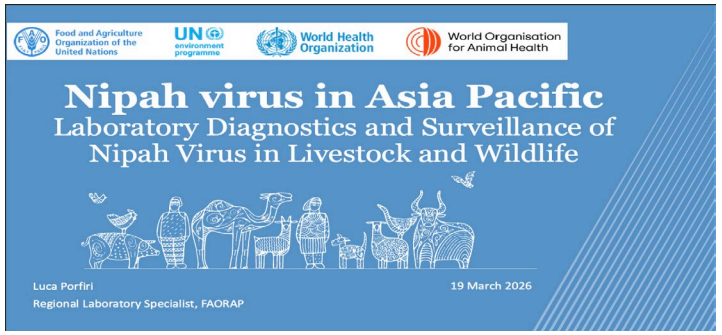

Knowledge exchange and networking among key stakeholders and partners in the region.

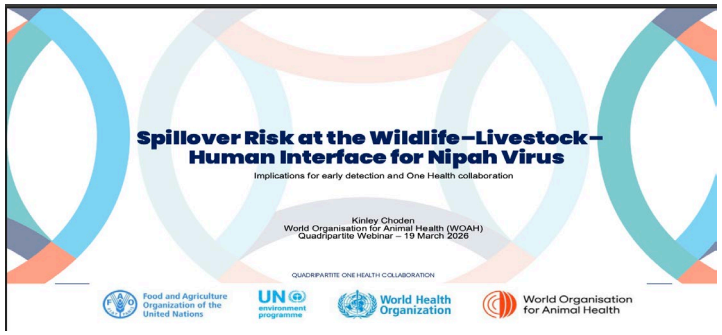

Five voices, one coherent picture

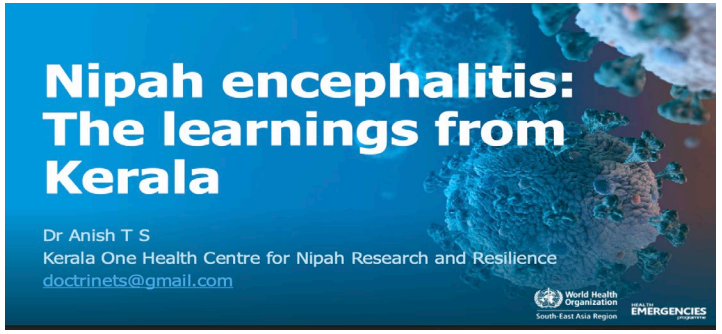

Dr Gyanendra Gongal, WHO
Nipah in Asia: the human-animal interface

Dr Luca Porfiri, FAO
Diagnostics and surveillance in livestock and wildlife

Dr Kinley Choden, WOAH
Spill-over risk at the wildlife-livestock-human interface

Dr Anish T S, Kerala, India
Lessons learned on preparedness and response

Rizza Araceli Salinas, Philippines
Bat surveillance, Sultan Kudarat, Mindanao

A network built before the crisis

Convene

Bring stakeholders together

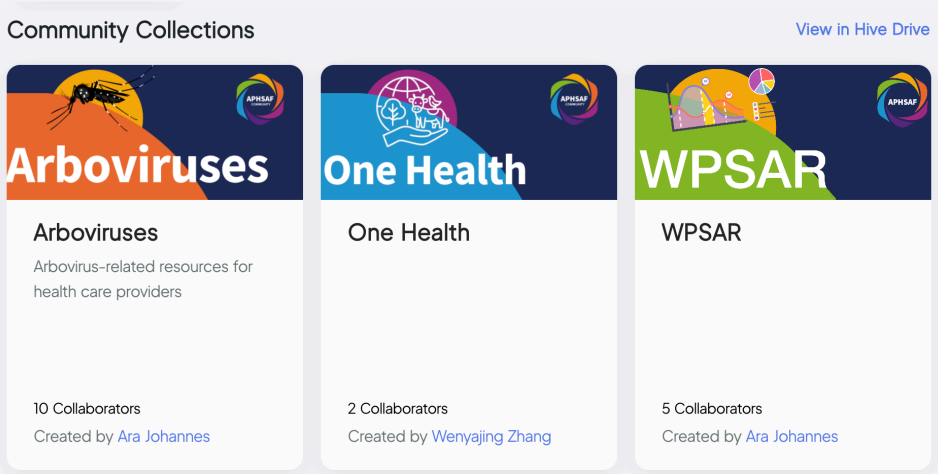

Share

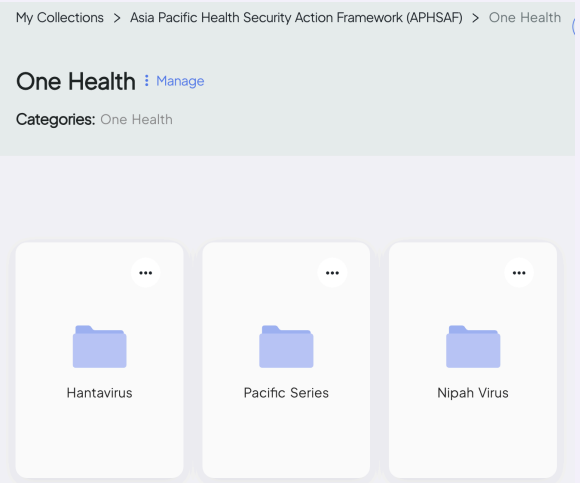

Knowledge and resources in one place

Connect

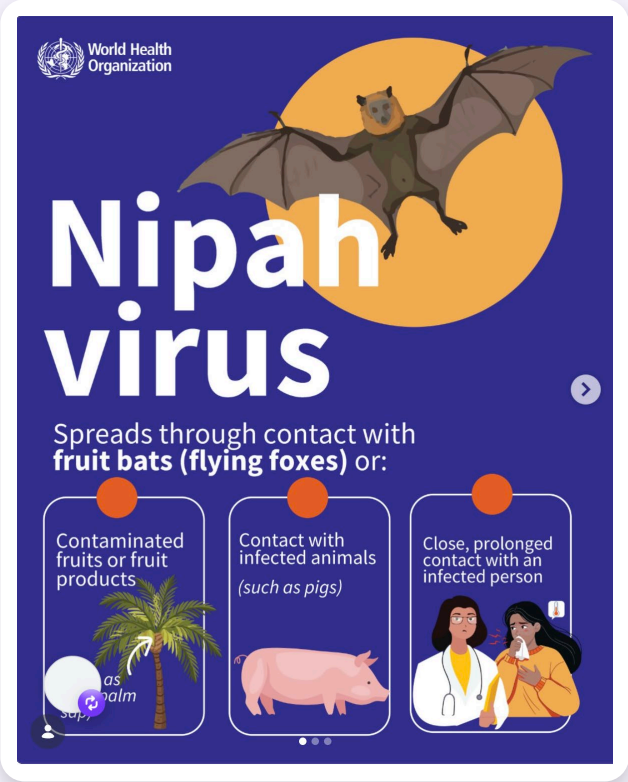

Experts who can rely on each other in a crisis

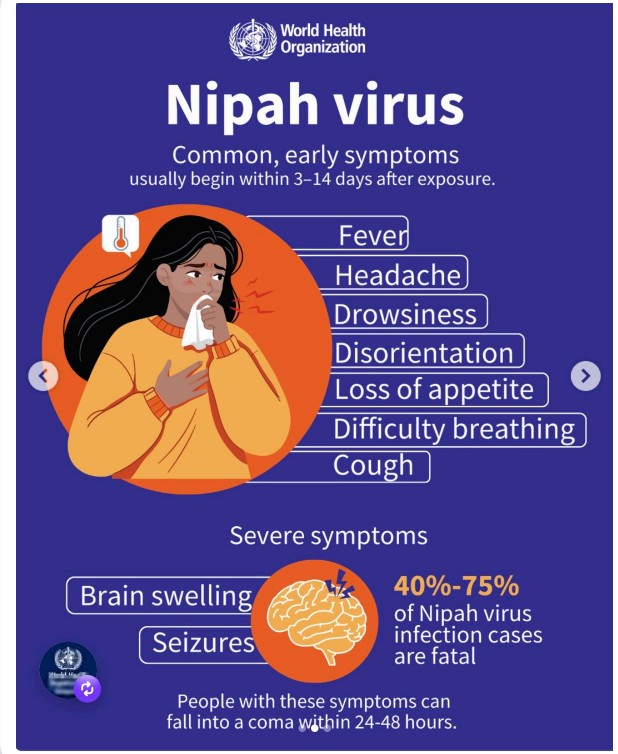

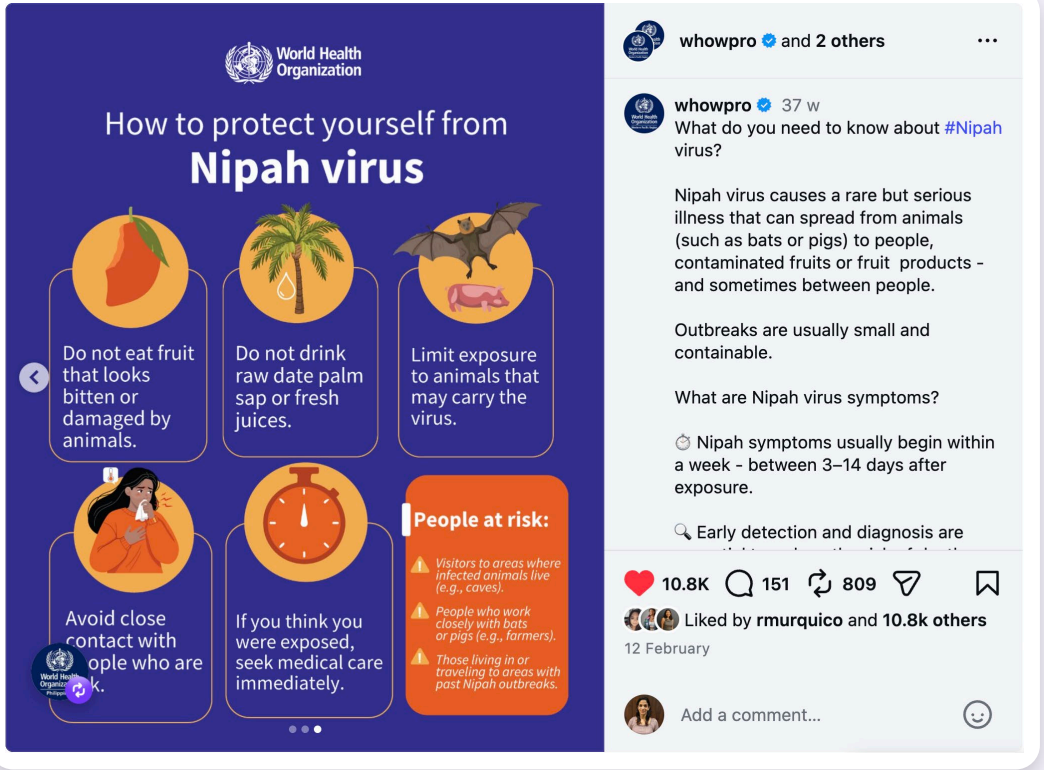

Co-created and co-branded for the public

Know the virus

Know the symptoms

Know how to stay safe

Disseminated widely through the joint networks of the Quadripartite

Pooling our reach in the Pacific

Country delegates and Quadripartite and partners representatives at the 2nd Quadripartite Pacific One Health Workshop.

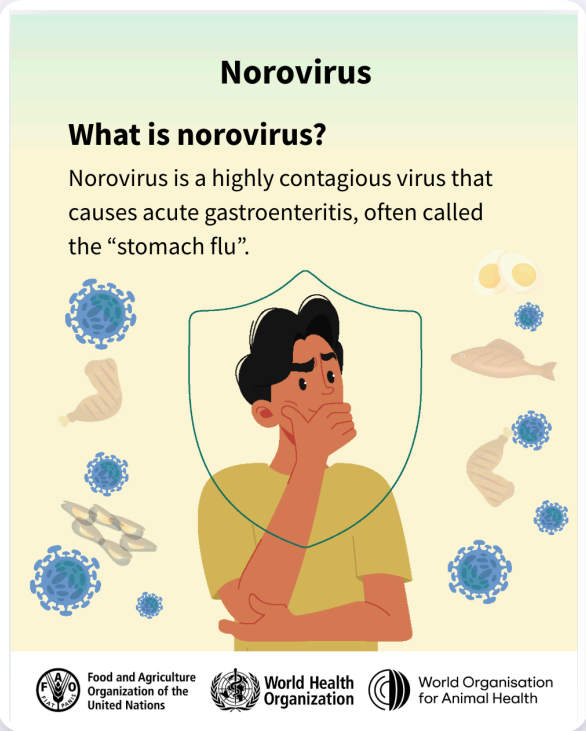

Co-produced

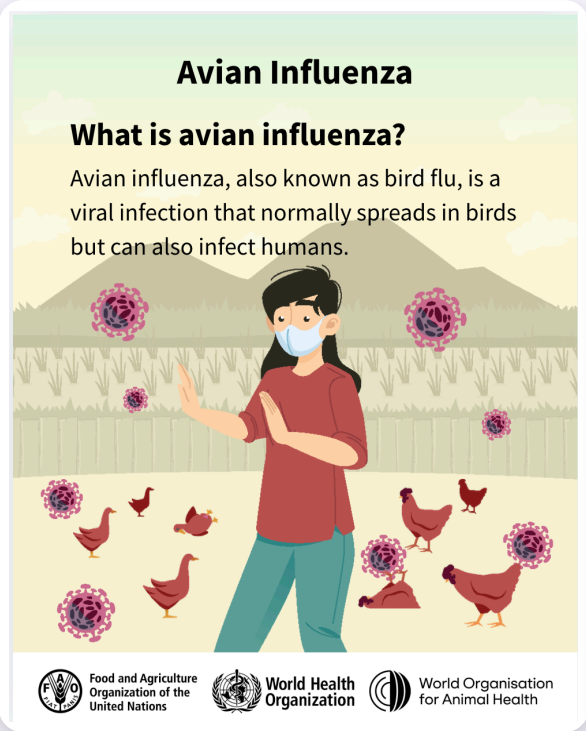

Jointly disseminated

Wider reach than any one of us alone

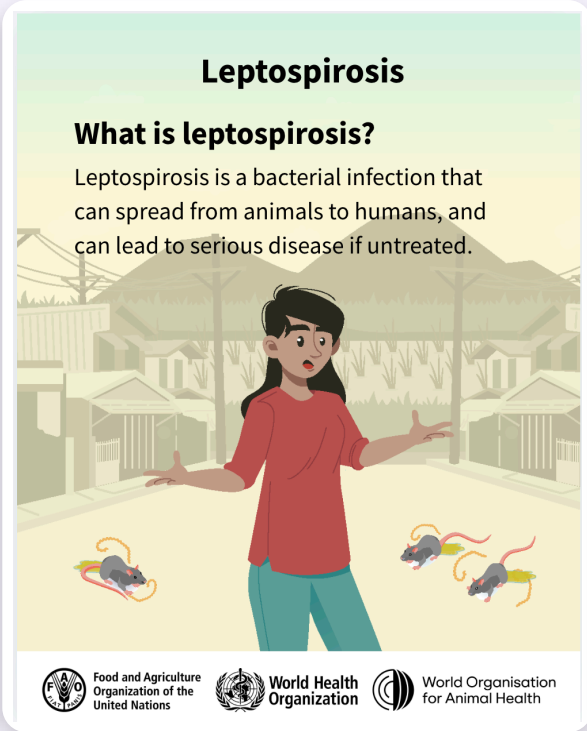

Shared resources to minimize risk

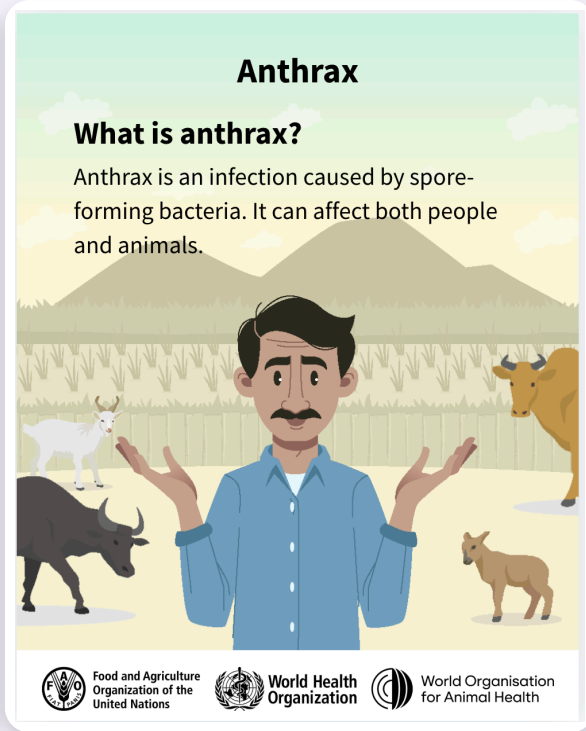

Norovirus

Avian influenza

Leptospirosis

Anthrax

Every reel: signs and symptoms | transmission | staying safe

Human health does not exist in a vacuum
