

#### Lumpy Skin Disease (LSD) An Update on LSD Preparedness

#### Indonesia

#### Pebi Purwo Suseno

Senior Veterinary Officer

Directorate of Animal Health, DGLAHS, MoA

Second LSD Coordination Meeting for South East Asia, 16 December 2021

# **Preventive LSD Vaccination**

- No policy for preventive vaccination for LSD
  - Exotic to Indonesia
  - Vaccination will be the strategy if LSD is confirmed
- New regulation
  - Allow importation of vaccine for emerging diseases
  - Inactive Vaccine
  - Emergency use authorization
  - Live attenuated vaccine  $\rightarrow$  need further arrangement
- Protocol for vaccination in emergency  $\rightarrow$  under discussion

#### Updates on LSD Preparedness

- Increase surveillance sensitivity
  - General Surveillance
  - Reporting suspected cases via ISIKHNAS
- Diagnostic lab capacity
  - 3 veterinary labs have capacity to diagnose/test for LSD
    - Research Center for Veterinary Sciences (RCVS), Bogor
    - Disease Investigation Centre, Bukittinggi
    - Disease Investigation Centre, Wates
  - Other veterinary labs have receive training for LSD testing
- Development of contingency plan for LSD
  - On progress
  - Simulation exercise

#### Animal Health Laboratories

## Updates on LSD Preparedness

- Awareness raising
  - ISIKHNAS Coordinators
  - Social media (Facebook, Instagram, Twitter)
  - Target audiences: Local veterinary officers, central veterinary officers, Lab diagnostic staff, Communities
  - Circular letters

## Updates on LSD Preparedness

• Series of Webinar: LSD Preparedness

# Challenges in LSD Prevention and Control

- Vaccine for LSD prevention can be imported when LSD is suspected
- Only inactive vaccine can be imported
- Compensation scheme
- Training for field animal health officers

# Way Forward

- Finalizing LSD contingency plan
- Simulation exercise
- Updating regulation on emergency use authorization for vaccine
- Training for field veterinary officer

## **TERIMA KASIH - THANK YOU**
