

The DFAT Project and PVS Pathway (and related) Opportunities

**PVS Pathway Orientation Training Workshop for South-East Asia
10-13 December, Bangkok, Thailand**

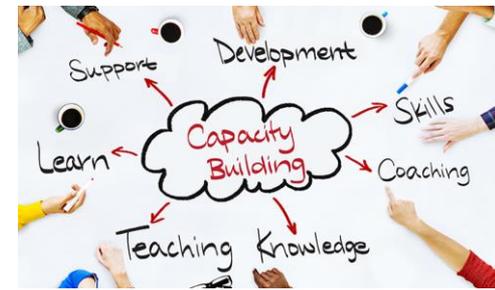

Capacity Building (of VS)

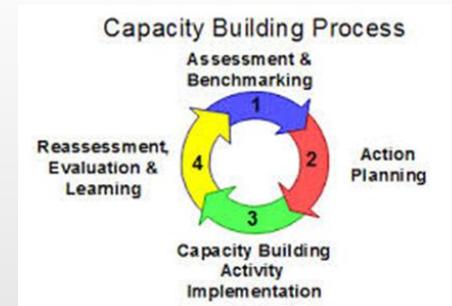

- *Capacity refers to the ability of an individual, group, organisation or system to deliver intended outcomes, while capacity building refers to improving the ability of the entity to perform.’ (Brown et al 20011)*

Capacity Building

- is a process of **change**, and **managing transformations**.
- a **long-term process**, not a once-off intervention
 - but there can be short-term results
- an **internal) process**
 - meaning that change needs to be driven from within an individual and/or organisation to build a self-sustaining model.

Australian-funded projects supporting OIE Capacity Building

- SEAFMD/SEACFMD –since 1997
 - Strengthen members capacity to control FMD
- PSVS – 2007-2010/11
 - Program for strengthening VS
- STANDZ – 2011-2016/17
 - Stop Transboundary Animal diseases and Zoonoses

WORLD ORGANISATION FOR ANIMAL HEALTH
Protecting animals, preserving our future

Australia-OIE

One Health Partnership (2019-2022)

Two complimentary projects funded by Australian Government

Enhanced capacities of countries in South-East Asia to detect, control and prevent the spread of priority Transboundary Animal Diseases (TADs)

- Island countries in SE Asia, Timor Leste and PNG
- Improve knowledge on priority diseases:
- VS capacity on surveillance, risk analysis, biosecurity, emergency preparedness,
- Improved regional coordination for TADs risk on the management

Australia-OIE One Health Partnership

- All ODA eligible countries in SE Asia, Timor Leste, PNG
- Improved regional health security by strengthening target countries' veterinary services capabilities using a One Health approach to anticipate, avert and arrest infectious disease threats

Expected Outcome

- *Contribute to improved regional health security by strengthening target countries' veterinary services capabilities using a One Health approach to anticipate, avert and arrest infectious disease threats*

Objectives

- Strengthen priority critical competencies identified in PVS Pathway missions.
- Develop veterinary and veterinary para-professional workforce through the use of international standards in their training – especially for rabies and AMR surveillance.
- Improve regional animal disease (including zoonoses) reporting via WAHIS for use by animal and human health decision makers

Support global and regional priorities

- IPCHS' priority fields of action
- OIE international standards, guidelines and tools,
- Country priorities and needs as identified through PVS Pathway reports,
- WHO IHR (2005) and corresponding MEF
- WHO-OIE national Bridging workshops
- National Action Plans for Health Security .
- OIE/FAO GF-TADs priorities;
- The Global Strategic Plan and regional rabies (ARES) strategies
- The Global Action Plan on AMR and the OIE Strategy on AMR
- The (OIE, FAO and WHO) cooperation to combat health risks at the animal-human-ecosystems interface in the context of the One Health approach and including AMR,
- The Tripartite's Commitment providing multi-sectoral, collaborative leadership in addressing health challenges.

3 components

- Governance of Veterinary Services and Intersectoral Partnerships for Health Security
- Veterinary and Veterinary Para-professionals Workforce Development
- Reporting to Modern and efficient Animal health information systems

Governance of Veterinary Services

- PVS Sub-Regional Orientation Training
- PVS Evaluation Follow-Up and PVS Gap Analysis missions
- IHR/PVS NBWs, One Health Planning and NBWs with AMR or Rabies focus
- Joint External Evaluations
- PVS Specific Content Missions
- PVS Strategic Planning Workshops

Governance of Veterinary Services

- PVS Self-Evaluation
- Veterinary Legislation
- AMR Improved Awareness and Understanding
- Veterinary Leadership and Management
- Public-Private-Partnerships

Veterinary and Veterinary Paraprofessionals Workforce Development

- Veterinary Education Support, including Twinning
- Workforce development through improving Veterinary Paraprofessional Education
- Strengthening Veterinary Statutory Bodies (VSB)
- Regional Seminars for National Focal Points
“Control and eradication of rabies in South East Asia “

Reporting to Modern and efficient Animal health information systems

- Support members compliance to OIE standards by building capacity improve disease data collection , analysis and reporting to WAHIS

Benchmark study

- Expand the benchmarking study conducted under the DA funded project to include Mekong countries , with a focus on One Health

- **Biosecurity**

- Biosecurity on farms, including ToT
- ToT innovation, new techniques and infrastructure to improve biosecurity, animal welfare and production in commercial pig farming systems and minimise environmental impact
- communication and public awareness tools focusing on biosecurity

- **Epidemiology**

- evidence to support claims of disease freedom
- TOT: to raise awareness in disease recognition, prevention and reporting of a broad range of stakeholders
- Epidemic swine diseases
- Participative epidemiology

- **Surveillance:**

- slaughterhouse and market surveillance

- **Laboratory:**

- Lab expertise and facilities
- For swine diseases
- Enhancing molecular diagnosis and FMD sampling

- **Development of surveillance/control programmes and M&E**

- Development of surveillance and monitoring programme

- **Data management**

- Data gathering, analysis, dissemination
- Information management systems
- Quality and verification of data entry or data sources
- Adoption and utilisation of information technology

- **Risk analysis**

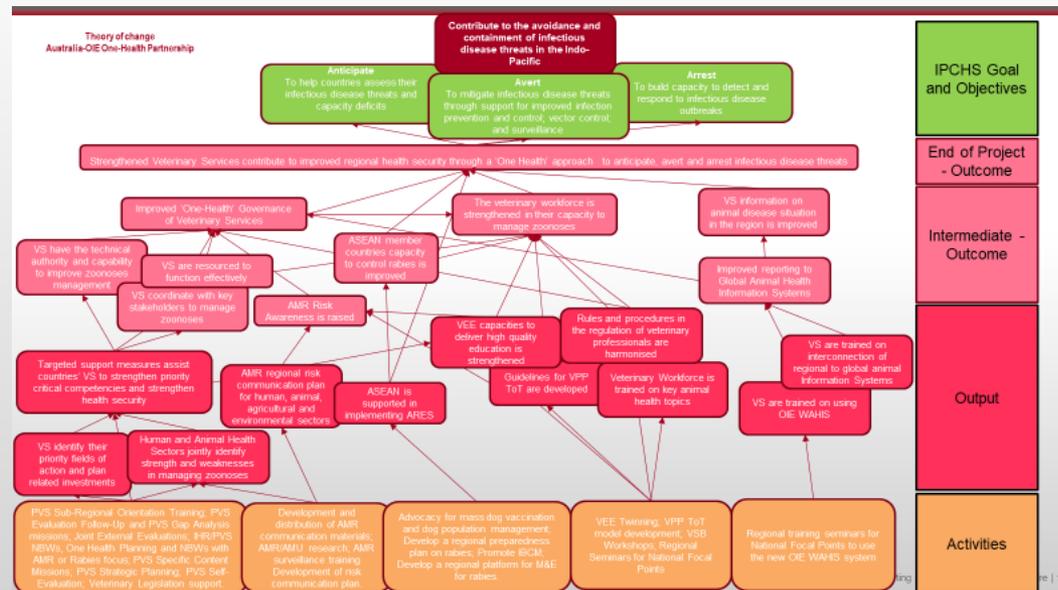

- Risk analysis/management
- transboundary animal diseases spread by water ways, such as from illegal dumping of contaminated carcasses
- Analysis of trade partners dossiers

- **Emergency preparedness**

- Emergency preparedness planning
- simulation exercise

Next Steps

- Finalize the M&E Framework and Theory of change
- Inclusion the priority activities identified during this workshop

Thank you for your attention
