

2018 Avian Health Workshop

Working Agenda

Workshop Objective: Increased understanding and utilization of zoning as an avian disease surveillance and control strategy in ASEAN countries.

Goals:

- Provide up-to-date science-based knowledge on surveillance, zoning and compartmentalization for avian disease control.
- Share experiences of participating countries in development and implementation of effective zoning strategies for control of avian diseases.
- Increase awareness and mutual recognition of zoning and regionalization programs.
- Strengthen professional networking among animal health regulatory agencies in the ASEAN region, northeast Asia and the United States.
