# CURRENT SITUATION OF AHS

Source : E smart surveillance  
24/4/20

	Province	Number of owner	Number of susceptible	Number of case	Number of death
1	Nakhon Ratchasima	35	1,013	379	342
2	Prachub kirichun	12	145	19	19
3	Chonburi	1	33	6	5
4	Phetchaburi	13	595	22	18
5	Chaiyaphum	1	3	1	1
6	Ratchaburi	1	18	7	6
7	Sakaew	3	22	4	3
<b>Total</b>		<b>66</b>	<b>1,829</b>	<b>438</b>	<b>394</b>

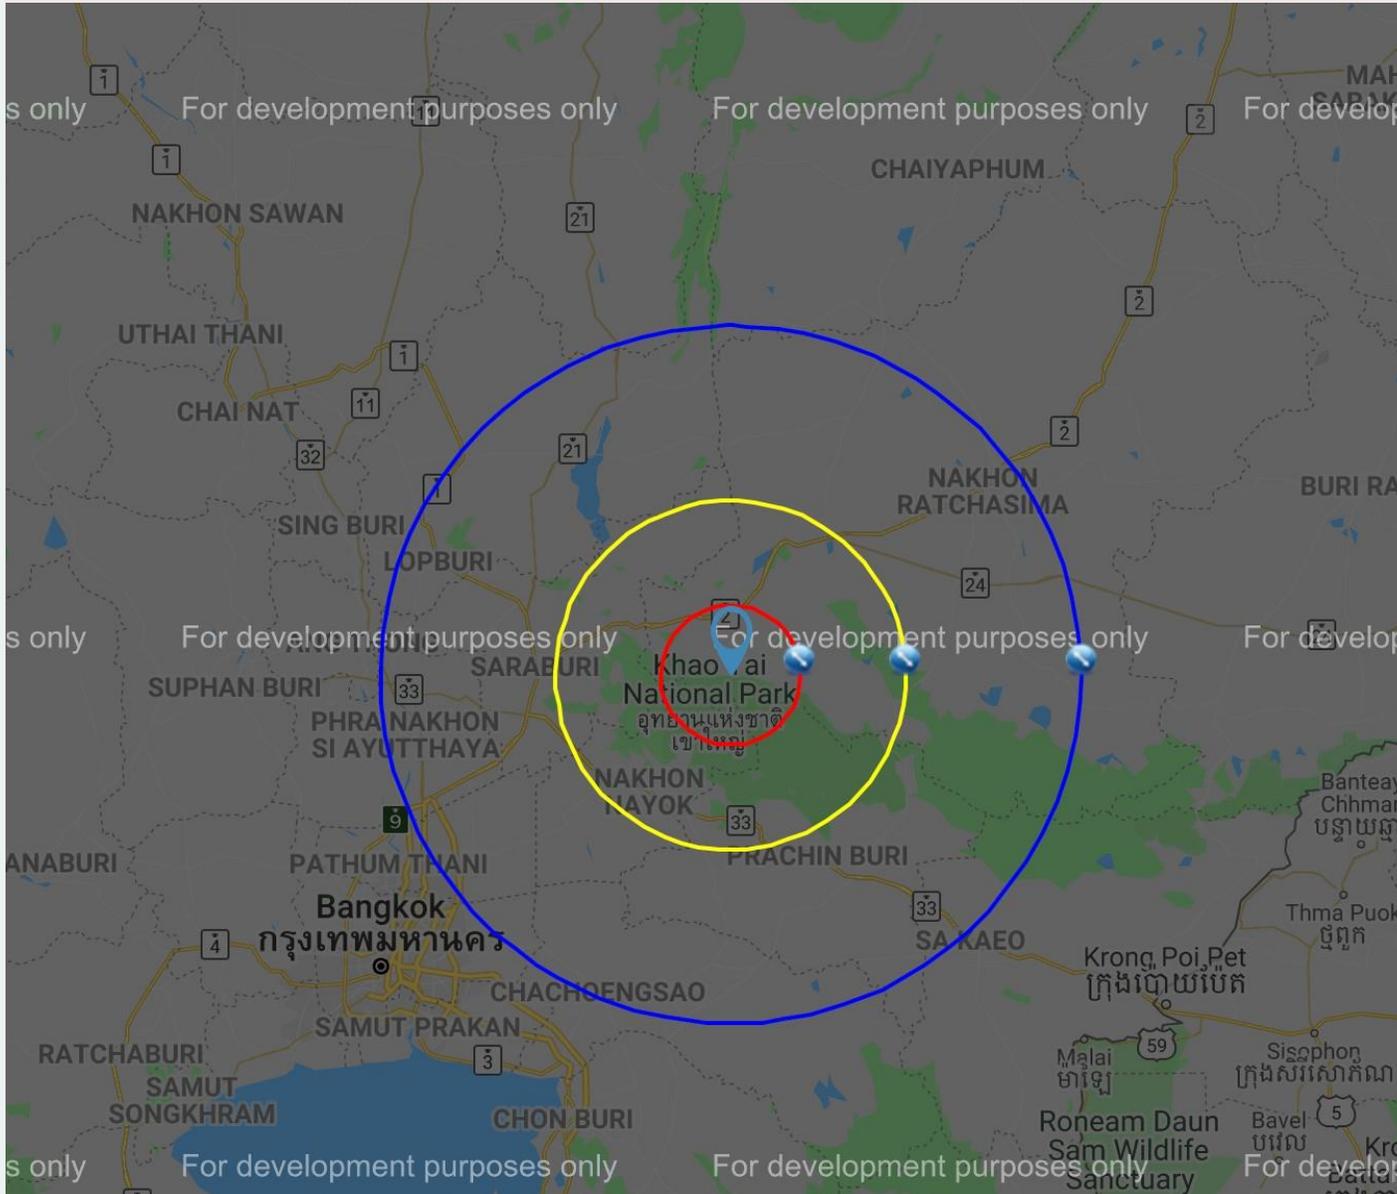

# Declaration of zones for disease control purposes

Divided into 3 zones

**1. Control zone: 20 km  
radius from IP**

**2. Protection zone: 50 km  
radius from IP**

**3. Risk area: 100 km  
radius from IP**

<b>Control measures</b>	<b>Control zone</b>	<b>Protection zone</b>	<b>Risk area</b>
<b>Clinical monitoring</b>	<b>Monitor body temperature twice a day. If any abnormal symptoms has been detected , immediately notify DLD for further investigation.</b>		
<b>Vector control</b>	<b>Owners will be advised to protect equidae against vectors to reduce the likelihood of a susceptible animal becoming infected. Use an appropriate insecticides recommended by DLD on equidae or insect repellents. Additional vector control such as net / hood /fly sheet can also be used.</b>		
<b>Movement restriction</b>	<b>All movement of Equidae is prohibited until there is no case of AHS for at least 90 days</b>		
<b>Vaccination plan</b>	<b>Strategic vaccination</b>		<b>Prohibited of Vaccination</b>
<b>Movement control (After vaccination)</b>	<b>All vaccinated equid are prohibited to move and stabling in an insect proof housing for 30 days</b>		
<b>Establishment of a containment zone</b>	<b>No reported case of AHS in Equidae for at least 90 days.</b>
