

Protecting Fiji from Rabies

WHY WE NEED TO END RABIES NOW

Canine rabies is one of the world's oldest diseases, eliminated in countries like the US and the UK, but still a daily threat to millions around the world.

Every **09** minutes, a person dies from **RABIES.**

100% of human cases are preventable.

Domestic dogs cause over **99%** of human rabies deaths.

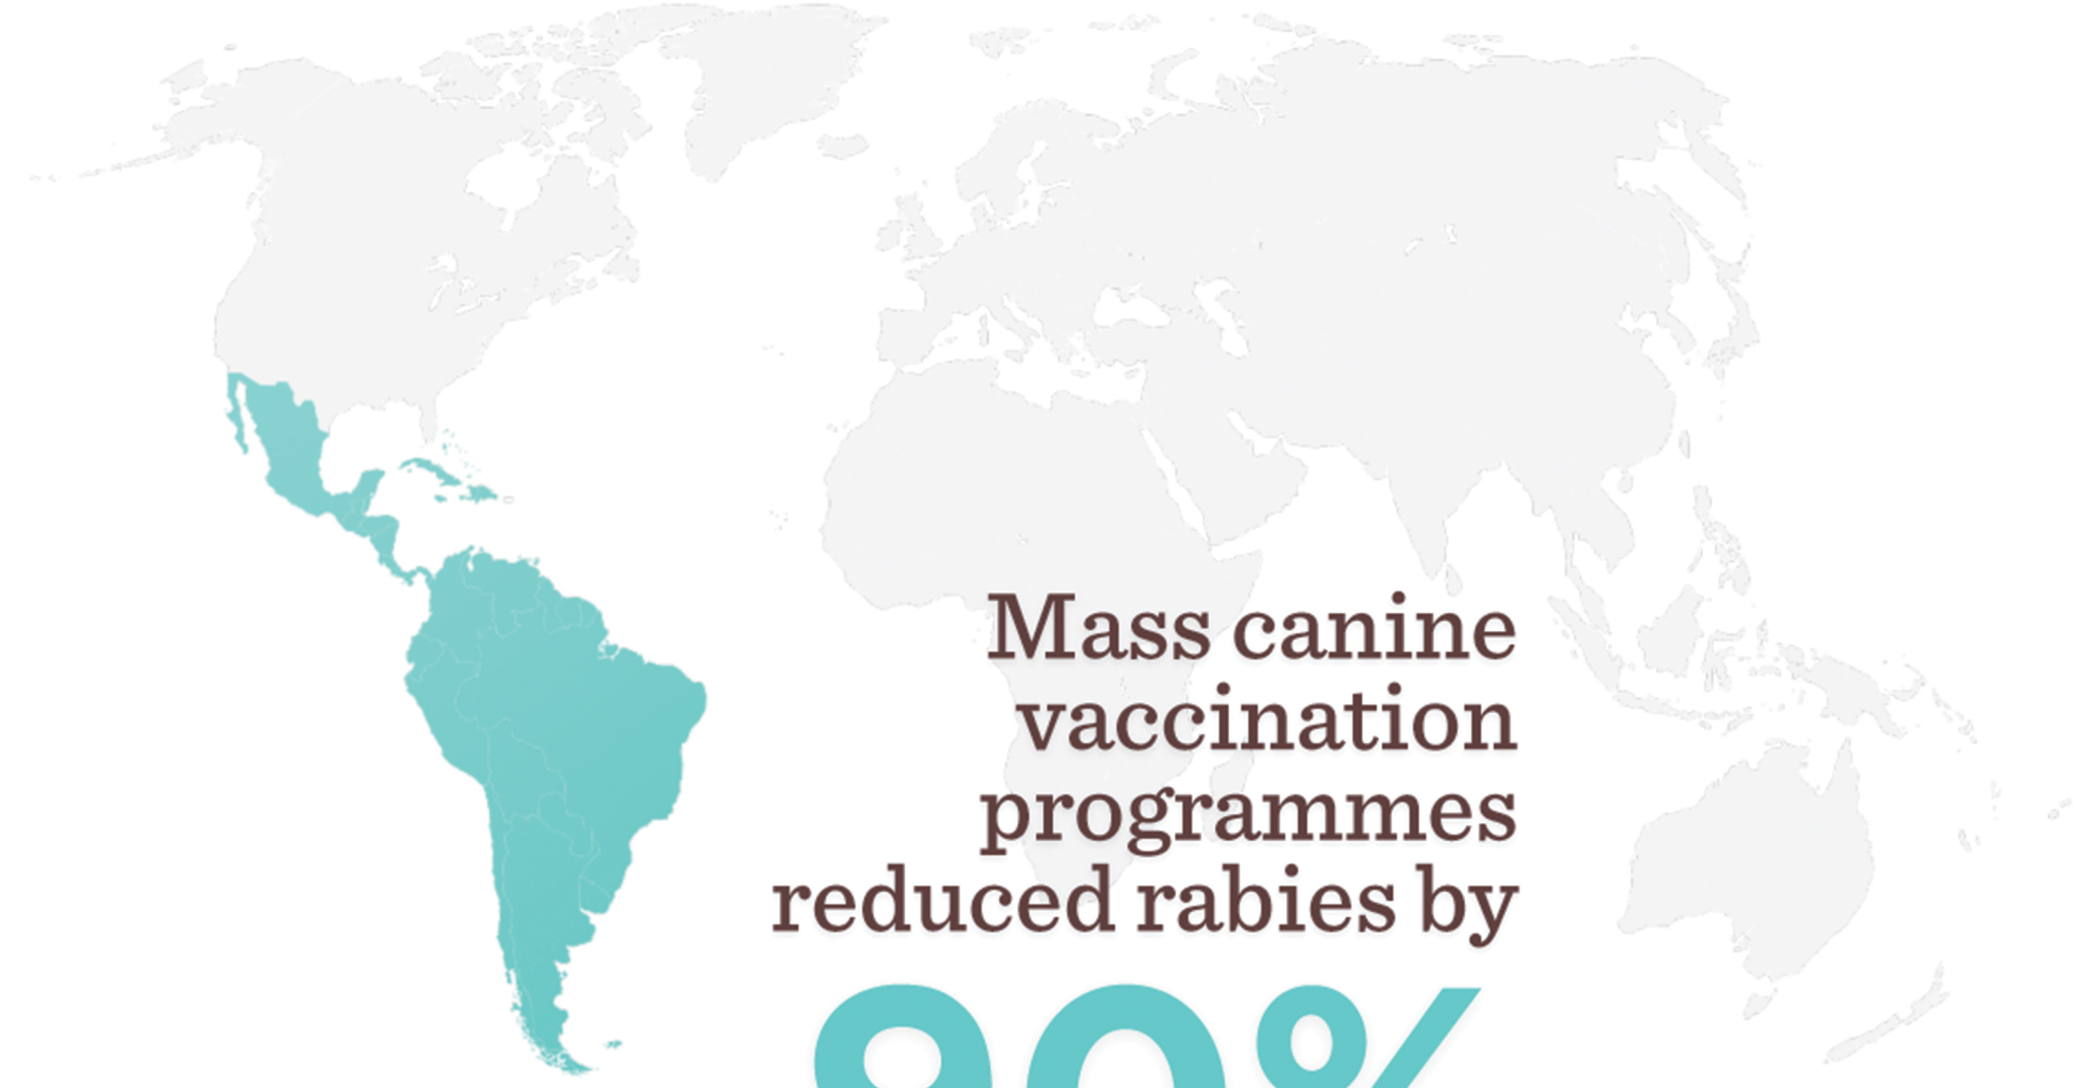

Vaccinating **70%** of dogs in at-risk areas can eliminate canine rabies.

Nearly **85%** of the world is at risk of contracting canine rabies.

95% of human rabies deaths occur in Africa and Asia.

Mass canine vaccination programmes reduced rabies by **90%** in Latin America.

Canine rabies kills more than

59,000 people every year.

2.9 million lives are saved annually due to preventative measures.

It doesn't have to be this way.

Together, we can end rabies for good.
