

“PVS Pathway Follow-up Workshop – planning ahead in times of COVID-19” Virtual Meeting

13 July 2021

14.00-16.00 Bangkok time (GMT+7)

Concept note & logistical information

CONTEXT

As a flagship programme of the OIE, the PVS Pathway is an independent, country-driven, stage-by-stage process of systems evaluation and planning, to strengthen a country's Veterinary Services (VS) in compliance with the OIE's internationally agreed standards on the quality of VS.

The following PVS Pathway cycle diagram depicts the newly evolved PVS Pathway process:

The South-East Asian PVS Pathway *Orientation* training was held on 10-13 December 2019 to strengthen member country understanding of and engagement with the PVS Pathway, as well as developing a new sub-regional approach to the PVS Pathway. During this workshop, countries developed and presented a practical national/organisational planning for project related to PVS and One Health engagement over the next 12-24 months.

The OIE Sub-Regional Representation for South East Asia will organise a virtual meeting to follow-up on the conclusions of the Orientation training of December 2019.

OBJECTIVES

The objectives of this meeting will be:

- To inform SEA member countries on the adaptation of the OIE PVS Pathway tools to physical activity restriction due to the COVID-19 pandemic.
- To assess the country's progress along the workplan developed in December 2019 for PVS-related activities and One Health engagement, if any, and revise the country's plan considering the adjusted modalities.

MODALITIES

To achieve these objectives, participants in the December 2019 meeting will be sent back the plan they had developed and be requested to check internally the potential progress made and whether or not revision should be made to the plans. They will be requested to send back their feedback to the OIE, prior to the virtual meeting.

Then the meeting will focus on clarifying the needs and on discussing the implementation of these plans.

TENTATIVE AGENDA

14.00 - 14.10	Opening and presentation of the objectives of the meeting	R. Abila, OIE SRR-SEA
14.10 - 14.40	COVID lessons learned and PVS Pathway Evolution	M. Carron, OIE CBD
