Recap

Transboundary
animal disease

Affects small
ruminants in about
70 countries;
another 50 at risk

Causes high
morbidity and
mortality & impacts
food security

Classified as a
priority disease by
the GF-TADs

Eradication of PPR by 2030

2015

2017 - 21

PPR in the ASEAN region

Historically
free from
PPR

Detection of PPR antibodies in Vietnam in 2008

Animal Biodiversity and Emerging Diseases: Ann. N.Y. Acad. Sci. 1149: 259–262 (2008).

ANIMAL BIODIVERSITY AND EMERGING DISEASES

Examples of Probable Host–Pathogen Co-adaptation/Co-evolution in Isolated Farmed Animal Populations in the Mountainous Regions of North Vietnam

PPR reported for the first time in South East Asia

PPR in the ASEAN region

Myanmar, Laos and Vietnam share border with PPR positive countries

Need to be prepared for an introduction of PPR or an incursion of PPRV from endemic countries

Objectives

Enhance the knowledge and skills of the key staff from national veterinary services on PPR through virtual training.

Understand the risk of PPR incursion and countries' preparedness through risk assessment

Enhance early warning and response to PPR incursion in the ASEAN region through the development of ASEAN PPR Preparedness Strategy.

Objectives

Enhance the knowledge and skills of the key staff from national veterinary services on PPR through virtual training.

Risk analysis

Image courtesy: FAO

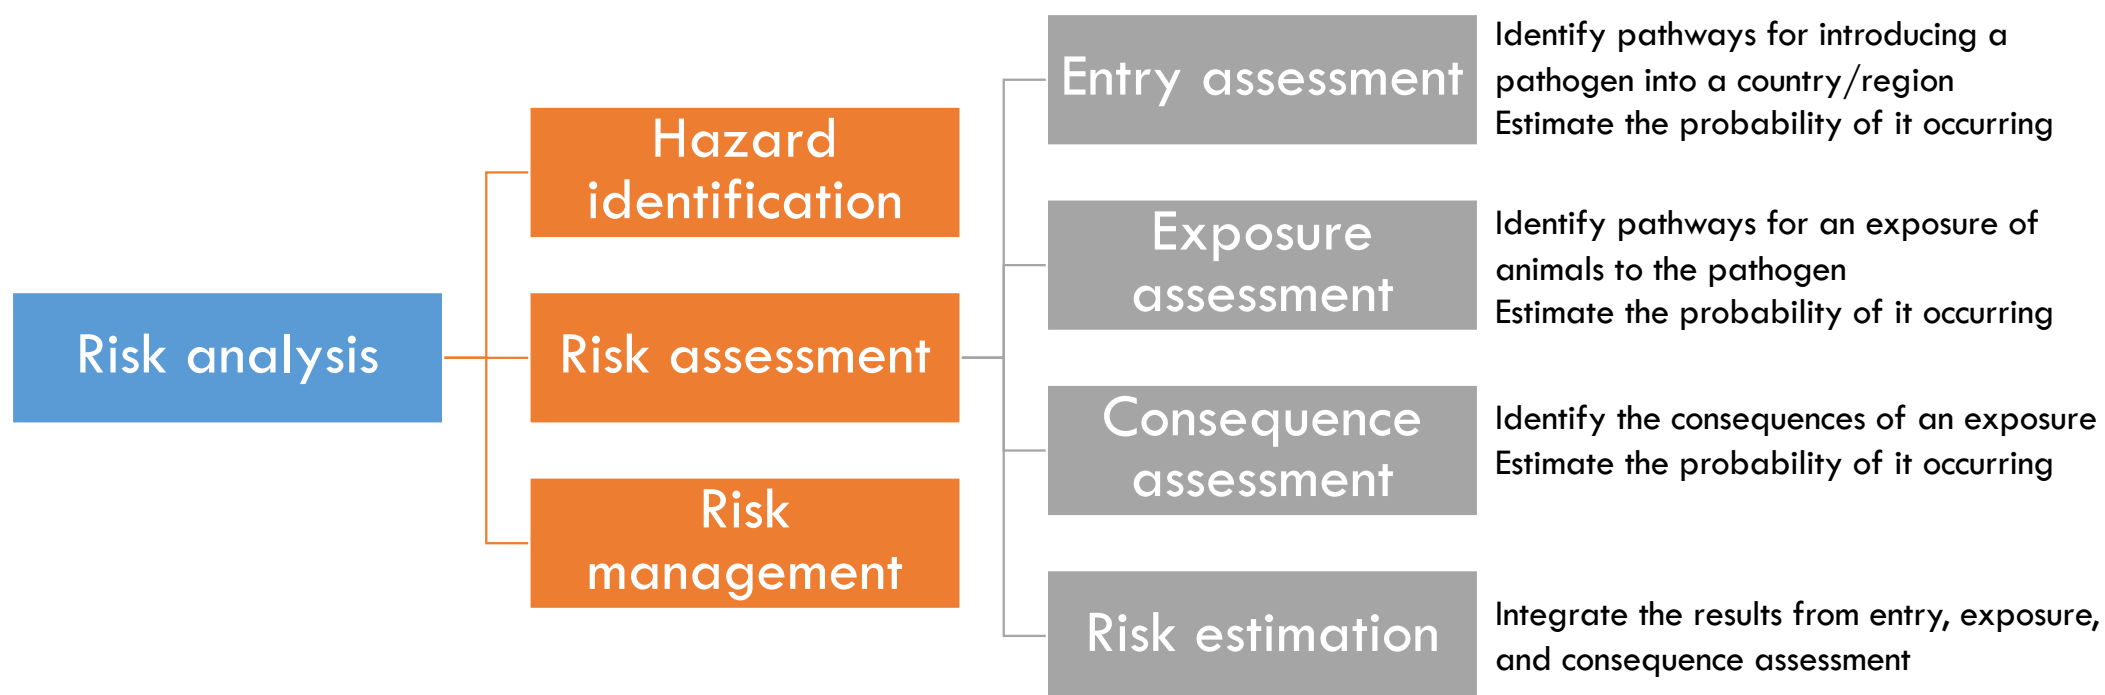

What is a risk analysis?

“A tool intended to provide decision-makers with an objective, repeatable and documented assessment of the risks posed by a particular course of action.”

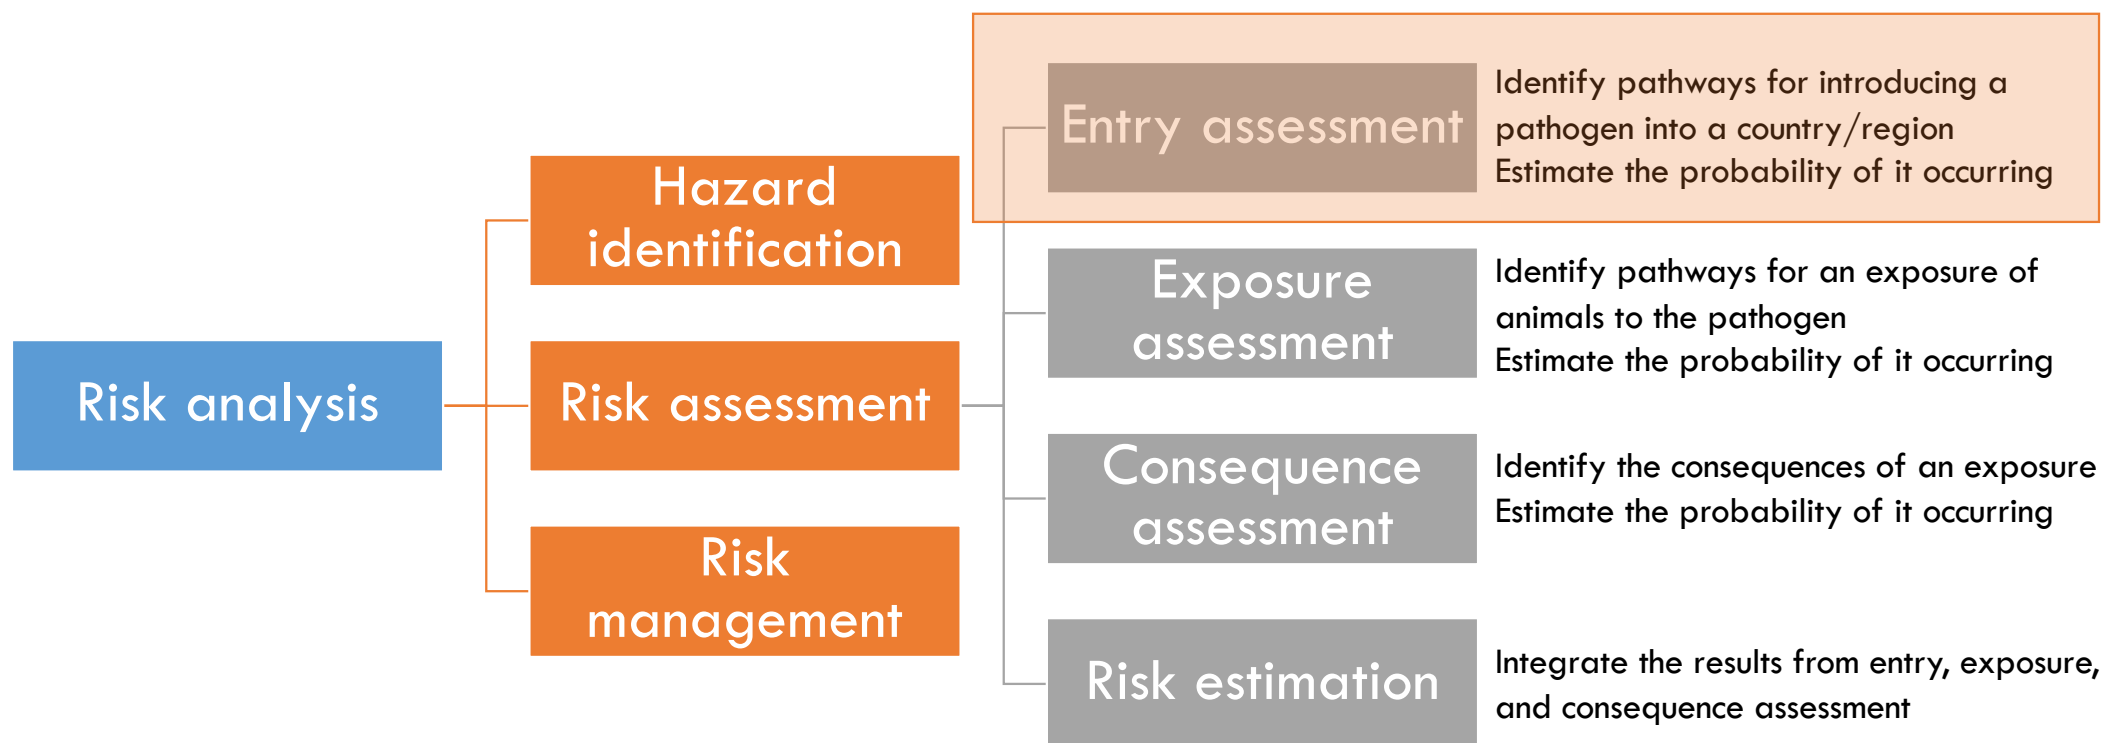

What is a risk analysis?

What is a risk analysis?

What is a risk analysis?

Objectives of PPR risk assessment

Identify the pathways of the introduction of PPRV into the ASEAN region

Collect and analyse data

Estimate the likelihood of the introduction of PPR into the ASEAN region

Risk pathways being considered

Importation of live domestic sheep and goats through legal or illegal trade

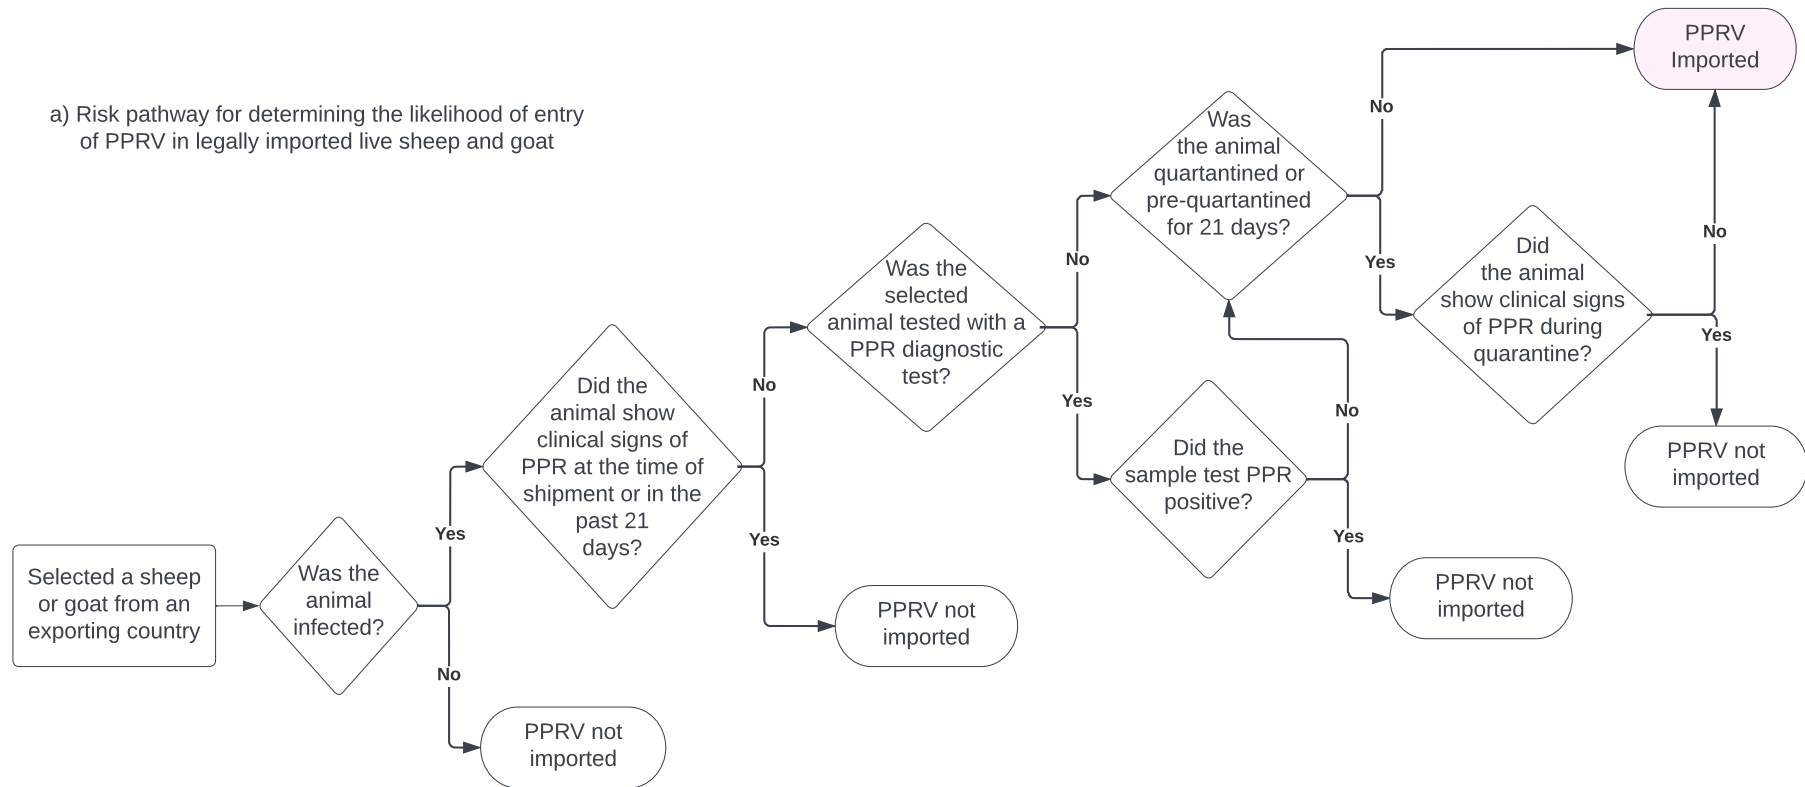

Importation of chilled and frozen sheep/goat meat and tissues through legal or illegal trade

Importation of sheep/goat semen and embryos through legal trade

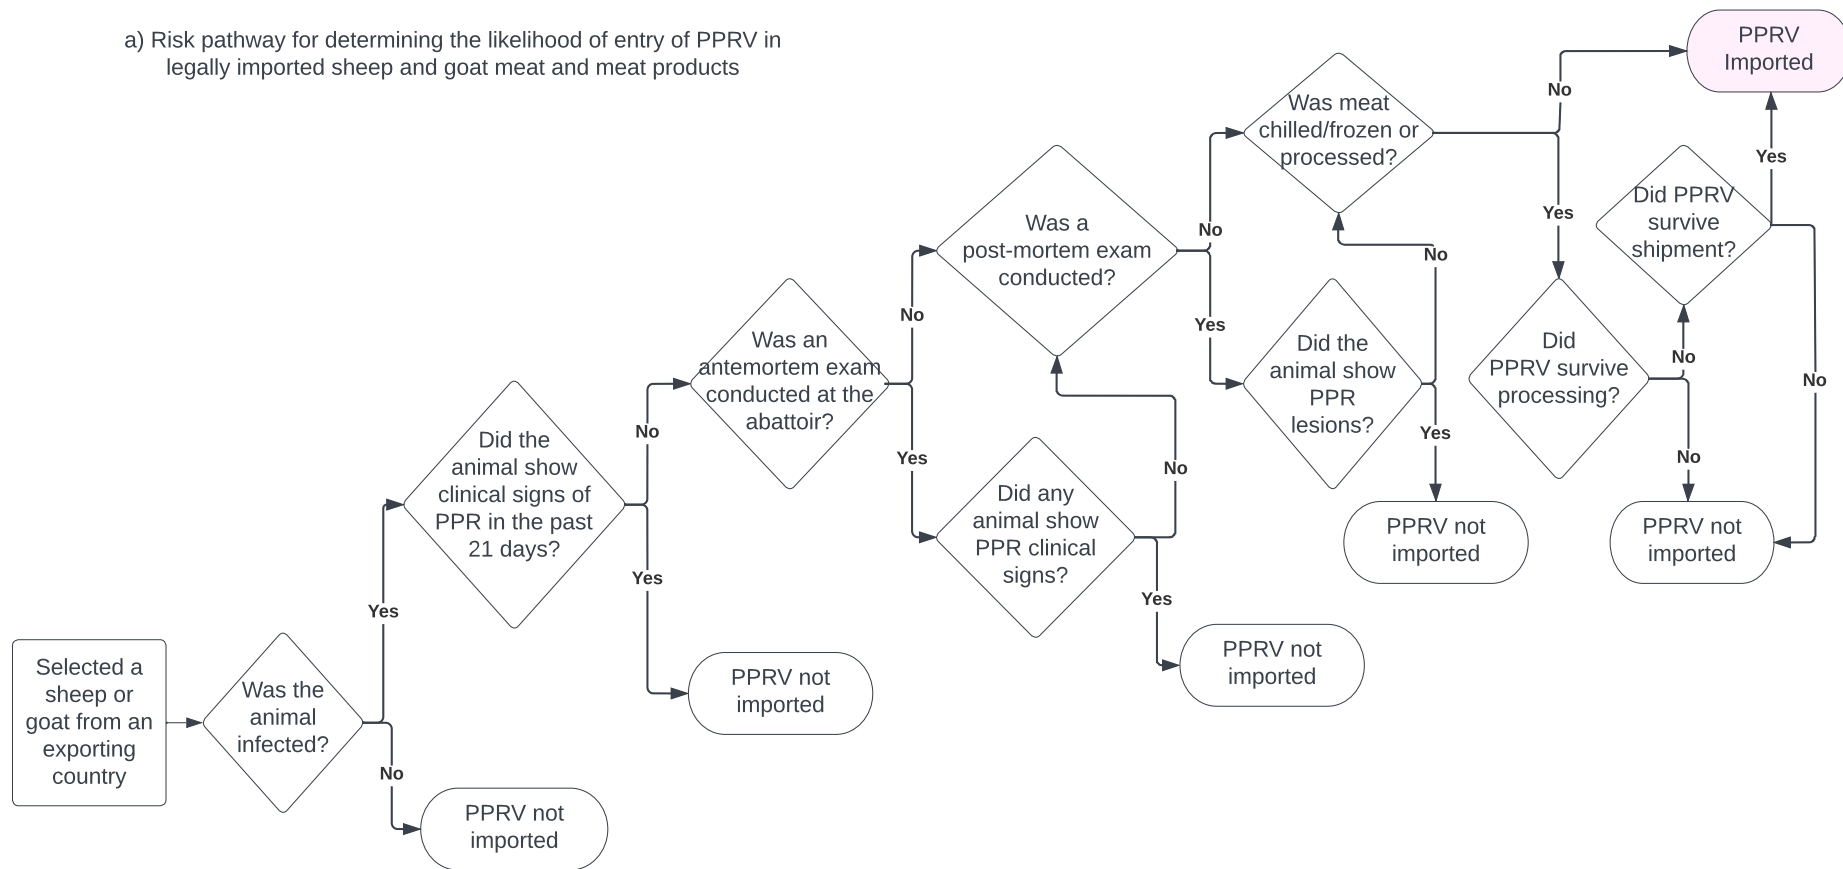

Draft pathway for importing live animals

a) Risk pathway for determining the likelihood of entry of PPRV in legally imported live sheep and goat

Draft pathway for importing meat and meat products

a) Risk pathway for determining the likelihood of entry of PPRV in legally imported sheep and goat meat and meat products

Example: Data analysis for live animal import

The volume of trade and the PPR status of the exporting country

Importing country: Indonesia

Exporting country	2002	2003	2004	2005	2006	2007	2009	2010	2012	2013	2015	2018	2019	2020	PPR status
China		1498													Present

Criteria to estimate the likelihood

Risk category	Definition
Negligible	The event is almost certain not to occur except in exceptional circumstances.
Very low	The event is very unlikely to occur.
Low	The event is unlikely to occur.
Moderate	The event may occur.
High	The event is highly likely to occur.

Example: Qualitative risk estimate

Based on the volume of trade and the PPR status of the exporting country

Country	Risk estimate
Brunei Darussalam	Very low
Cambodia	Very low
Indonesia	Low
Laos	N/A
Malaysia	Moderate
Myanmar	N/A
Philippines	Negligible
Singapore	Negligible
Thailand	High
Viet Nam	Negligible

Combine probabilities

Probability 2						
Probability 1	Negligible	Very low	Low	Medium	High	Very high
Negligible	Negligible	Negligible	Negligible	Negligible	Negligible	Negligible
Very low	Negligible	Negligible	Very low	Very low	Very low	Very low
Low	Negligible	Very low	Very low	Very low	Low	Low
Medium	Negligible	Very low	Low	Medium	Medium	Medium
High	Negligible	Very low	Low	Medium	High	High
Very high	Negligible	Very low	Low	Medium	High	Very high

Workshop early November

Express your interest to Dr Karma Rinzin in
attending a workshop to create risk pathways
and conduct PPR risk assessment

Objectives

Enhance the knowledge and skills of the key staff from national veterinary services on PPR through virtual training.

Understand the risk of PPR incursion and countries' preparedness through risk assessment

Enhance early warning and response to PPR incursion in the ASEAN region through the development of ASEAN PPR Preparedness Strategy.

Preparedness

Image courtesy: FAO

Preparedness

Measures to ensure that a country/region can effectively respond to an emergency

Early
Detection

Rapid
Response

We cannot always predict an emergency, but we can be prepared for it

Keith Hamilton, Head of the Preparedness and Resilience Department at WOH

Preparedness elements

An effective
surveillance
system

Trained
veterinary
workforce

Relationships
with
stakeholders

Adequate
resources

Adequate
laboratory
capacity

Legal
framework

Coordination

Awareness
and
engagement

The ASEAN PPR Preparedness strategy is likely to be drafted by early next year...

Summary

PPR training

PPR risk assessment

To be completed by
November 2022

ASEAN PPR Preparedness Strategy

Aiming to complete by
February 2023

Thank you
